Locks or unlocks the phone if pressed longer in the standby mode.

Changes various text input modes if pressed longer at the text-editing screen.

Adjusts earpiece volume while making a call, and moves the cursor upward in the menu.

Controls the key tone volume in the standby mode if the handset flip is opened, and moves the cursor upward in the menu.

Adjusts earpiece volume while making a call, and moves the cursor downward in the menu.

Controls the key tone volume in the standby mode if the handset flip is opened, and moves the cursor downward in the menu

Turns the camera capture mode on.

Works as a camera shutter in the capture mode.

Safety Precautions

Using a handset while driving is prohibited.

With regards to the regulation about prohibition of handset usage while driving, please check relevant laws and regulation and comply with them

- Use of your cellular while you are driving may disturb your concentration on driving and consequently incur accidents. Please turn it off as far as possible.
- Should you use your handset in an emergency, please make use of the hands free built in your car or pull over your car in a safe place for a while for your utmost safety.
- The electronic wave energy emitting from your handset may affect the electronic device built in your car. Please pay attention to this characteristic.

Cellular Use Restriction Area

Make sure to turn your handset off in the handset usage restricted area.

Using a Handset in the Explosive or Dangerous Area is not Allowed

Please turn your handset off in the area with explosive or dangerous materials (such as gas, gas station, or chemical goods) and abide by any instruction or signal. Never try to detach your cellular battery from the handset in such areas, either.

Boarding Airplane

- Please turn your handset off when you are on the airplane. The electronic wave from your handset may affect the electronic navigation device in your airplane.

Using Medical Equipment

- Please turn your handset off while you are in the hospital.
- Please abide by the regulations or rules of the hospital.
- Please turn off your handset when using the medical equipment for private purposes if possible. You should consult with the manufacturer or an expert before you use it.

Installing a Vehicle Hands Free

- Please keep a vehicle hands free off the driving radius, air bag expansion range, or whatever area may cause injury.

Effect of Cellular and Electronic Device

Few electronic devices may be affected by the electronic wave emitting from the cellular in service. Please be careful.

Display Off Mode.

If you don't press any key in a minute when the internal and external display are dimmed, the internal display goes into the Off Mode to save the power. Press any key to restore the display from the Off Mode.

Selecting Functions and Options.

Handset provides several customization functions, which are arranged in menus and sub-menus. You can access to these function using three

Soft keys ( , ) and [OK] key).

Each menu and sub-menu allow you to view and change the settings of the particular function.

Soft key function varies depending on the current context; the labels or icons at the bottom line of the display indicate the current function.

To view various functions/options available or select the one that is required:

1. Press the appropriate Soft key.
2. To select function displayed or option highlighted, press the []
[Select] Soft key or [OK] Soft key.
3. To highlight the next option on a list, press the Up key or Down key.
4. To move back to the previous function or option on a list, press the [C] key
5. To return to Standby Mode, press the [] key.

In some functions, you may be prompted for a password or PIN. Enter the required code and press the [OK] Soft key.

2.2 External LCD Display

You can use several menus even the folder is closed.

The following section describes the external LCD screen display and easy-to-control external menus with its function.

 Side Up	- Adjusts the earpiece volume and moves up the cursor in the menu during a call.
	- Mutes the ring tone if pressed at an incoming call.
	- Rejects the incoming call if pressed at an incoming call.
	- Turns the flashlight on if pressed longer.
	- Starts scrolling if pressed in the external menu screen.

 Side Down	<ul style="list-style-type: none"> - Adjusts the earpiece volume and moves down the cursor in the menu during a call. - Mutes the ring tone if pressed at an incoming call. - Rejects the incoming call if pressed at an incoming call - Goes to the external menu screen if pressed longer (Shown with Profiles/Recent Calls/Inbox/Infrared Port) - Starts scrolling if pressed in the external menu screen.
 Extra Key	<ul style="list-style-type: none"> - Turns the camera capture mode on, if pressed longer. - Works as a camera shutter in the capture mode. - Selects a menu or moves to the sub-menu, if pressed in the external menu. - Exits from the menu screen and returns to the standby screen if pressed longer in the external menu screen.

External Menu List

Press the side volume  key longer in the standby mode.

-  **Profiles:** Selects a menu among Normal, Silent, Meeting, Outdoor, or Car.
-  **Recent Calls:** Lists up the recent calls.
-  **Inbox:** Lists up incoming SMS messages.
-  **Infrared Port:** Activates or deactivate the infrared port.

Side Key Special Functions.

① Snap Shot

Close the folder to initiate the camera function.

Press the side  key longer to activate the camera shooting

mode. Press the  key shortly again to take a photo. And then, the shot image will be displayed in the screen. At this time, press

short the  key to save the picture with auto naming. In the

 View mode, press the  side key to return to the camera capture mode.

Press the  key longer to move to the standby mode.

① Flash on

You can use the handset as an emergency light.

Press the Side volume  key longer in the standby mode.

The camera flash is lighted automatically for 10 seconds. Press

the  key or  key to flash off during this time.

3. SIM Card

3.1 SIM Card

When you subscribe to your network operator, you will get a SIM (Subscriber Identity Module) card containing your registration information. (PIN, the existence of additional service and so on).

Like a credit card, it should be kept securely and handled carefully.

Do not bend, scratch or expose to moisture.

Avoid static electricity.

To avoid memory corruption of your SIM card, always switch off your phone before removing or inserting your SIM card.

3.2 Installing/Removing the SIM card

1. Remove the battery from the unit.

2. If the SIM slot is empty, insert the SIM card into the slot.

3. If you want to remove the SIM card, push the SIM card to the arrow direction as shown in the below figure.

4. Using the battery

4.1 Installing the battery

Put the metal locators of the battery into the hole located at the bottom of the unit, as shown in the below figure.

Press the upper side of the battery until you hear “click” sound.

4.2 Removing the battery

Push up the battery holding button and remove the battery.

4.3 Charging the battery

This handset uses the Li-ion battery. Make sure to use the authorized battery and charger only. For more details, please inquire at your nearest dealer.

You can use the handset during battery recharging.

When the battery is mounted on the handset, open the cover located at the bottom of the handset and connect an adaptor. An adaptor is provided with the handset.

If recharging is completed, detach the adaptor connection from the outlet.

Tip

Your handset is powered by a Lithium Ion (Li-ion) battery.

You can use the following Li-ion battery types for your handset. (Contact

your local dealer for more information.)

Standard-type battery.

Slim-type battery.

4.4 Precautions while Using the Battery

- Do not use a damaged battery or charger.
- Use the battery for the specified purpose only.
- The closer you are to the base station, the longer the handset usage time because less battery is consumed for connection.
- Battery charging time varies depending the remained battery capacity and the battery and charger type in use.
- Battery life is shortened as time goes by.
- Use authorized battery and charger only.
- Since overcharging may shorten battery life, remove the battery from its charger once it is fully charged. Unplug the charger once charging is complete. Leaving the battery in hot or cold places, especially inside a car in summer or winter, may reduce the capacity and life of the battery. Always keep the battery under normal temperatures.
- Do not ground the battery. Grounding may occur when the battery is in contact with a conductive object. A grounded handset may also damage the battery.
- Dispose and recycle used batteries in accordance with local regulations.
- Do not dispose of the batteries in a fire.
- Do not use an unauthorized charger.

- In order to prevent injury or burns, ensure that a metal object does not come into contact with the + and – terminals of the battery.

. Basic Functions

1 Switching the Phone On or Off

2. Making a Call

3. Answering a Call

4. Options in Calling

5. Using the Earpiece

6 Selecting the Menu Function

7. Entering the Texts

1. Switching the Phone On or Off

1.1 Switching the Phone On

Open the folder.

Press the [] key until the phone switches on.

If the handset requests you to input the PIN, enter the PIN and press the [OK] Soft key.(For further details, see menu 6.7)

Your handset starts to search for the available network and the current date and time will appear on the internal and external displays. Once connected to the network, you can send or receive a call.

If the malfunction occurs while using the handset or it is not turned on, remove the battery and install it again after 5 or 10 seconds.

Note: To change the language, use the Language menu option (Menu 6.3).

1.2 Switching the Phone Off

To switch the phone off, press the [] key until the power-off animation displays.

2. Making a Call

2.1 Making a Call

Enter the area code and the phone number to make a call in the standby mode, and press the  key.

Note: If you have set the **[Auto Redial]** option (**Menu 6.2.3**) to **[On]**, the handset will attempt to make a call automatically for up to 10 times if it is not answered.

To clear the last digit displayed, press the **[C]** key.

To clear the all digits displayed, press the **[C]** key longer.

2.2 Ending a Call

When you want to finish your call, press the  key shortly or close the folder.

Once the call is completed, the call summary (Receiver Name or Number, Service Time) will be displayed.

2.3 Using Call Logs

The phone stores up to 30 dialled, received or missed calls chronologically. The last call is saved in the first position. If the same

number was dialled more than once, only the latest occurrence will be saved.

Press the  key shortly to see call log list aligning dialled, received, or missed numbers chronologically.

Press the **[Up/Down]** key to select a number.

Press the  key for dialling. (See **Call Logs** for more details.)

*** Tip:** Press the  key longer to redial the last number in the call log.

2.4 Using Contacts

You can store the frequently - used names and phone numbers in the SIM card or the handset memory, which are jointly called by the Contacts. Then, you don't have to remember all your numbers; simply select the name to recall the associated number.

(For further details about the **Contacts** feature, see menu 2)

Press the  key or the  key in the standby screen to access to the '**Contacts**' Menu and '**View Names**' List respectively
Select a number from '**View Names**'.

Press the  key for dialing (See **Contacts** for further details.)

2.5 Making an International Call

Press the [0] key longer for the international prefix until '+' character appears on the display or enter the outgoing national code.

Enter the country code, area code and phone number you want to make a call.

Press the [] key.

2.6 Speed-dialing from Contacts

Press the 'Speed Dial' number longer to make a call using the number you have saved. For example, press the [5] key longer to dial a number which has been saved "5" in Speed Dial List.

For speed dial numbers longer than 2 digits, press the first one shortly and then press the second one longer.

(See Speed Dial Setting for more details.)

2.7 Making the Emergency Call

You can make an emergency call without the SIM.

Enter '112' number and then press the [] key,

Or, press the [SOS] Soft key if no SIM Card is available.

3. Answering a Call

3.1 Answering a Call

When you receive a call, the phone rings (or vibrates) and screen will display the name or the number of the caller (If network supports and you have subscribed to it).

If the caller can be identified, the caller's phone number or name will be displayed if it is stored in your Contacts.

To answer a call, open the folder.

If it is already open, press the  key.

If the answer type is set as **[Any Key]**, you can answer a call by

pressing any key except  key.

3.2 Viewing Missed Calls

If the incoming call could not be answered for any reason, a missed call message will appear on the screen to remind you of the call you have missed (Network and subscription dependent feature, not available at all areas necessarily)

To reply to the missed call;

Keep the folder open.

Press the **[View]** Soft key to display a list of missed calls.

If necessary, scroll to the number you want by pressing the **[Up/Down]** key.

Press the  key to recall the missed call.

Press the **[C]** or  key to close missed call notification message

3.3 Rejecting a Call

Press the  key or the **[Reject]** Soft key when the folder is open. If the **[Reject]** Soft key is pressed, the caller will receive the busy line tone.

When the folder is closed, press the **[Side Up/Down]** key longer during ringing for incoming call

3.4 Adjusting the Volume during a Call

During a call, if you wish to adjust the earpiece volume, use the volume keys on the left side of the phone.

Press the **[Side Up]** key to increase the volume level and the **[Side Down]** key to decrease it.

The current volume level will be displayed on the screen.

In the standby mode with the folder open, you can adjust the key tone volume using the **[Side Up/Down]** key.

4. Options in Calling

During a call, press the [] key to show the call option.

4.1 Switching the Microphone Off (Mute)

You can temporarily switch your phone's microphone off so that the other person cannot hear you.

For example, you may wish to say something to another person in the room but do not want the calling person to hear you.

Press the [**Mute**] Soft key shortly,

Or, select Option followed by 'Mute' to activate the Mute function.

To switch the microphone back on:

Press the [**Sound**] Soft key shortly.

Or, press the [**Option**] Soft key and then press the [**Select**] Soft key or [**OK**] key, when [**Sound**] highlights.

4.2 Putting a Call on Hold

You can place a current call on hold whenever you want. You can make another call while you have a call in progress if this service is supported by your network service provider. Of these two calls, one is active and the other is on hold and you can switch between the calls.

To place a call on hold, simply select the [**Option**] Soft key followed by

[**Hold**], or press the [] key.

You can reactivate the call whenever you want by selecting the [**Option**] Soft key followed by [**Retrieve**].

Once a call is held, the name and icon of the caller will be faded in gray.

To make a call while you have a call in progress:

Enter the phone number that you want to dial or look it up in the Contacts.

Press the key to dial the second call.

The first call is automatically put on hold.

To switch between two calls, simply press the [**Swap**] Soft key.

The current call is placed on hold and the call on hold is reactivated so that you can continue conversation with the other person.

If you want to finish, complete each call normally by pressing the [] key.

4.3 Answering a Second Call while You are on a Phone Call

You can answer an incoming call while you have a call in progress, if this service is supported by your network service provider and you have activated the [**Call Waiting**] option (see menu 6.2.4). You will be notified of an incoming call by a call waiting tone.

To answer a call while you have another call in progress:

Press the [] key to answer the incoming call.

The first call is automatically put on hold.

To switch between two calls, press the [**Swap**] Soft key.

To end the current call, press the [] key.

The call on hold is automatically reconnected to you.

4.4 Searching for a Phone Number in Contacts

You can search for a number in your Contacts during a call.

Press the [**Option**] Soft key.

If necessary, press the [**Up/Down**] key to highlight the [**Contacts**] option. Press the [**Select**] Soft key or [**OK**] key.

Select the preferred search types like Name, Group, and Photo.

Press the [**OK**] Soft key.

The Contacts entries are listed.

Enter the first few letters of the name for Name Search.

The Contacts entries are listed starting with the first entry matching your input.

Note: You can also scroll through Contacts from the beginning, by pressing the [**Up/Down**] key.

To view the highlighted entry, press the [**OK**] Soft key.

For further details about the Contacts feature, see menu 2

4.5 Using the DTMF tones

You can turn the DTMF key tones off or on during a call.

When the [**DTMF Off**] option is selected, your phone does not transmit the key tones. It allows you to press keys without hearing the annoying key tones during a call.

To communicate with answering machines or computerized telephone systems, the [**DTMF On**] option must be selected.

4.6 Transferring a Call

You can transfer the current call to the call on hold if this service is supported by your network service provider, so that the callers can talk to each other. You will be disconnected from both of them.

During a call, answer or make a call in the normal way, and press the [**Option**] Soft key.

Press the [Up/Down] key to select the [**Transfer**] option and press the [**Select**] Soft key or [**OK**] key.

Two people are connected to each other.

4.7 Using the Message Service

You can read or write a new message during a call.

Press the [**Option**] Soft key.

Press the [Up/Down] key to highlight the [Message s] option.

Press the [Select] Soft key or [OK] key.

To read a received message, select the 'Inbox' submenu, and then scroll to the message that you want to read.

To write a new message, select the 'Write New' submenu.

Press the [OK] Soft key.

(For further details about the Text Message menu, see menu 1.1)

4.8 Making a Multi-party Call

A multi-party call feature is a network service that allows up to six people to take part in a multi-party or conference call simultaneously.

For more information, contact your service provider.

To make a multi-party call;

Call the first participant in the normal way.

Call the second participant in the normal way.

The first call is automatically put on hold.

To join the first participant to a multi-party call, press the [Option] Soft key and select the [Join All] option.

Press the [Select] Soft key or [OK] key.

To add a new person to the multi-party call, call the person in the normal way.

Then, press the [Option] Soft key and select the [Join All] option.

Press the [Select] Soft key or [OK] key.

You can add incoming callers by answering the call and selecting the [Join All] option. Repeat the above steps as needed.

Upon organizing a multi-party call, you may view the people and their status in Multiparty with the [Left/Right] key.

An icon indicates either Far Multiparty or Far Held.

Having a Second Call During a Multi-party Call

To answer or make a call when you have the multiparty call:

To place the multi-party call on hold, press the [Option] Soft key and select the [Hold All Calls] option.

Answer or make a call in the normal way.

You can reactivate the multi-party call on hold by pressing the [Swap] Soft key.

To end the multi-party call, press the [] key.

Having a Private Conversation with One Participant

Press the [Option] Soft key and select the [Private] option.

Press the [Select] Soft key or [OK] key.

Press the [Up/Down] key to highlight a participant and press the [OK] key.

Now you can talk privately with that person.

The other participants can continue to converse with each other

To return to the multi-party call, press the [Option] Soft key and

select the **[Join All]** option.

Press the **[Select]** Soft key or **[OK]** key.

All of the multi-party call participants can now hear each other.

Removing One Participant

Press the **[Option]** Soft key and select the **[Exclude]** option.

Press the **[Up/Down]** key to highlight a participant and press the **[Select]** Soft key or **[OK]** key.

The call ends with that participant, but you can continue to talk with other participants.

Complete the multi-party call by closing the folder or pressing the

[] key.

5. Using the Earpiece

You can send or receive a call without touching the handset, using the ear-microphone.

When you connect the ear-microphone to the jack located at the top of the phone, the button on the ear-microphone works as described below;

To show the recent calls, press the button in the standby mode

To redial the last call, press the button twice in the standby mode

To answer a call, press the button when you receive a call

To complete a call, press the button when you have finished a call

6. Selecting the Menu Function

6.1 Entering the Menu Function

Key	Function
	Goes to the main menu in the standby mode.
	Goes to the Contacts menu
[Left], [Right] key	Moves among the main menus.
[Up], [Down] key	Searches for the sub-menu.
[OK] key	Goes to the sub-menu

Press the 4-way navigation keys in the main menu to move the menu.

See the bottom of the Sub Menu List to check the current setting values in the sub-menu.

Then, press the [Left/Right] key followed by [OK] key to change the preset menu value.

If you don't press the [OK] key, the new value will be cleared without saving..

Note: Press the [C] key to return to the previous menu.

Input the menu number to access to the sub-menu quickly.

6.2 Using the Shortcut Key in the Standby Mode

Key	Menu selected if pressed	If pressed longer
		Changes the menu style theme between grid and list.
	Contacts	Displays 'View Names'
[Right] key	Displays 'Write New'	Text Messages
[Up] key	Profiles List	Displays current ring tone
[OK] key	WAP	Directly connect to WAP browser
[Left] key	Favorites	Photo Gallery menu
[C] key	Calendar Monthly View	Camera capture mode
	Recent Call Logs	
	Camera capture mode	

7. Entering the Text

7.1 Input Mode

On many occasions you need to input the text while you are using your handset, (i.e., storing a name in the Contacts, writing a new message, creating your greeting or scheduling events on your calendar).

The available text input mode includes.

T9 mode

You can input the letter only one keystroke per letter. The keypad has more than one letter on it – when you press the [5] key once, J, K or L may be displayed.

The T9 mode automatically compares your keystrokes with an internal linguistic dictionary to determine the correct word, thus requiring far fewer keystrokes than the conventional Multi-tap mode.

Multi-tap mode

In this mode, you can input the letter you want by pressing the keypad once, twice, three or four times until the target letter appears.

Numeric mode

You can input the number in this mode.

Symbol mode

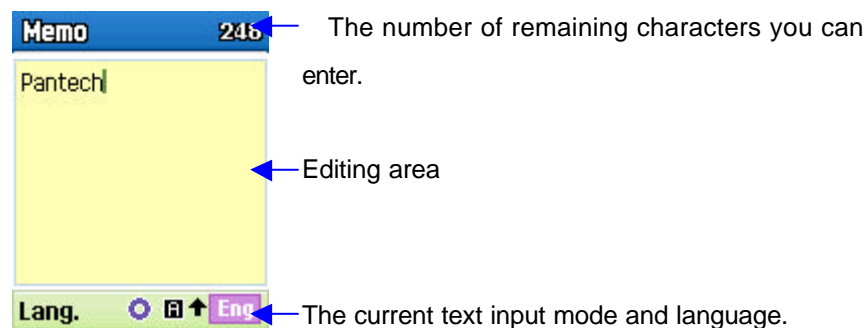

You can input the special characters like Greek letter, currency unit, or

period mark in this mode.

7.2 Changing the Text Input Mode

When you are at the area where you can input the text, the text input mode indicator will be displayed at the bottom of the LCD.

Example: Entering a memo.

To switch to other text input mode:

Press the right Soft key indicating the current text input mode.

Toggle to the mode you want to use by pressing the [D] right Soft key.

The **Language select** option allows you to change the text input language.

Inserting a Space

To insert a space between words, press the [0] key.

Or, at the end of line, press the [Right] key to add new space character.

Scrolling

To move the cursor to the left or right within the text, press the [Left/Right] key. And also, to move the cursor to the up or down among the lines, press the [Up/Down] key.

Note: By pressing the [Side Up/Side Down] key, the cursor could be moved very quickly to the beginning or the end of the text.

Clearing Letters and Words

To clear the letter to the left of the cursor, press the [C] key.

You can clear all of the letters on the display by long pressing the [C] key.

Returning to the Previous Screen

When the text input field is empty, press the [C] key to return to the previous screen.

TIP: To change the text input mode quickly

[*] Long press	Shows symbol screen.
[0] Short press	Enters a space Character
[#] Long press	Changes the text input mode
[C] Short press	Deletes characters one by one. Returns to previous screen after deleting all characters.
[C] Long press	Deletes all characters and moves the cursor at the beginning of the input screen.

7.3 Using the T9 Mode

In the T9 alphabet Editor, the word is composed completely as you input the text.

Press the keys numbered [2] to [9] to input texts. For example, press [4][3][5][5][6] in sequence to input 'hello'.

The word you are typing appears on the display. It may change with each key you press.

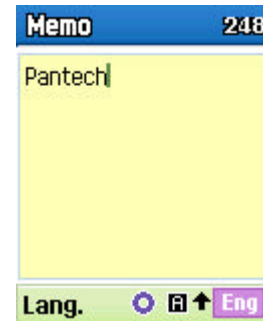

Enter the whole word before editing or deleting any keystrokes.

Upon searching a word, input the next text.

If you fail to search a word, press the [] key to search which text can be typed in. If several texts are searched, the text in the most frequently used will be listed first.

Continue entering the next word.

7.4 Using the Multi-tap Mode

When typing in the Multi-tap mode, press the key labelled with the target letter:

- Press the key once for the first letter.
- Press twice for the second letter.
- And so on

Example: To display the letter "C", quickly press the [2] key three times. To display the letter "K", press the [5] key twice. This method is called by Multi-tap typing.

Note: The cursor moves to the right when you press a different key. When entering the same letter twice or a different letter on the same key, just press the Right key or wait a few seconds for the cursor to move to the right automatically, and then enter the next letter. Refer to the table for more information about the characters available. The characters vary, depending on the text input language.

Changing the Case

To change the case of the next letter(s) that you type, press the [#] key.

There are three cases:

- Lower case (no indicator)
- Initial capital ()
- Capital lock ()

7.5 Using the Number Mode

The Number mode enables you to enter numbers in the text. Press the key corresponding to the digit you want to enter.

7.6 Using the Symbol Mode

The Symbolic mode enables you to enter symbols in your text.
To display more symbols, press the [Up/Down] key.
To input a symbol, press the number for a symbol, and the text will appear in the input screen.

Press the [#]key longer or [D] Soft key to escape from the Symbol mode.

If you entered a symbol with the hot key ([#] long key), press the key again to return to the previous mode.

And, press the [D] key to proceed to a mode next to the Symbol mode.

If you entered a symbol with the [D] key, press the key again to proceed to a mode next to the Symbol mode.

7.7 Using the Bopomofo Input Mode

Input the alphabet for a pronunciation.
Texts for the pronunciation will be displayed.
Press the [Up/Down] key to see the hidden symbols.
Press the number key longer for the text and it will appear in the input window.

Press the  key shortly to add a special symbol to a Chinese character. (Tone mode)

Press  shortly in the Tone mode to reenter the previous BPMF.

7. **Organiser**

1. Messages

Select 'Menu>1.Messages'

This menu allows you to create, send, read and save a message with the Short Message Service (SMS: Text message), Enhanced Message Service (EMS: Message including simple image, animation or melody) and Multimedia Message Service (MMS: Message supporting presentation of various media types, such as full colour images and polyphonic ring tones).

Voice mails are also available.

Note: This feature is available only if your service provider's network supports it. Contact your service provider for more information.

1.1 Text Messages

Press longer the [] key in the standby mode or select 'Menu>1.Messages>1.Text Messages'

Short message service (SMS) allows you to send and receive a short text message to and from other GSM handset.

Additionally, your handset supports the Enhanced Messaging Service (EMS), which enables you to make a short message consisting of simple picture, melodies, animation and styled text that add new features to simple text messages.

To send a text message by phone, you must obtain the number of the

SMS centre from your service provider.

Receiving a new message

When you receive a new message, the new message icon () and a notification showing the number of the message will appear on the display. You will also hear an alert, depending on the message sound setting; for further details, see '5.Profiles > 2.Message Alert'.

To read the new message(s) immediately, press the [View] Soft key. The list of the messages appears.

Note: To clear the new message notification on the display, press the [End] key. When you also have a missed call, voice mail, short message, or cell broadcast messages, the left Soft key indication changes like [View].

Managing memory

Inbox and Outbox share a given amount of memory in a SIM card. When the message memory is full, the full message icon () appears. In this case, you cannot receive any new message. You must delete one or more old messages to free the memory for new messages using the [Delete] option within the Inbox or Outbox or the [Delete All] option.

- **Write New:** Writes a new SMS or EMS
- **Inbox:** Displays the received messages as well as the one saved in the SIM memory.

'10' in [10/20] represents the number of unread messages, whereas '20' represents the number of saved messages.

- **Outbox:** Displays the message you have saved in the SIM memory. [10] represents the total number of messages saved in the Outbox.
- **Saved box:** Stores Inbox, Outbox or draft messages in the handset memory. [10] represents the total number messages in the Saved box.
- **Text Templates:** Displays the basic templates.
- **Settings:** Sets up the text message environment.
- **Memory Info:** Displays the free space of SIM or the handset memory.

1.1.1 Write New

Select 'Menu>1.Messages>1.Text Messages>1.Write New' and press the [OK] key.

You can write a message composed of the text, image or melody using this menu.

Creating a message.

On the first line of the display, you can see the number of remaining characters you can enter, and the number of current message you have create like. 

Note: For further information on how to enter characters, refer to the Entering the Text menu.

While entering your message, press the [Option] Soft key  to use the following options.

When you press the [Left/Right] key to select an item and press the [OK] key using the following option;

- **Add Picture:** Loads the selected item.
- **Add Animation:** Loads the selected item.
- **Add Melody:** The melody will be set up and played back once.
- **Add Emotion:** Loads the selected item.
- **Add Template:** Insert a clause stored in Template.
- **Language:** English, French, Simplified, Traditional, Russian, or Thai. The selected language will be displayed at the bottom of right corner.

1.1.2 Sending and saving a message

When you complete entering the message, press the [OK] key.

[Send Option] menu will pop up with the following options.

- **Send:** Input the receiver's phone number manually.
- **Send & Save:** Sends out messages like [Send]. Sent message will be automatically saved in Outbox.
- **Save:** Saves a written message in Outbox.

Input the receiver's phone number on the Number Screen

Press the [Option] Soft key [] to search for the number in the Contacts or Recent Calls..

You can add up to 5 receivers

Press the [OK] key to display the transmission progress with a sending animation.

If you fail to send out a message, "Resume?" will pop up and press the [Yes] Soft key to retry or press the [No] Soft key to save the message in Outbox.

1.1.3 Inbox

Select ' Menu >1.Messages>1.Text Messages>2.Inbox'.

Select Inbox and press the [OK] key to see the received messages one by one.

Select the [Reply] Soft key at the bottom of right corner to write a new message. The Write New screen will appear.

(Refer to 1.1.1 Write New.)

Callback number is already registered. You add information.

Select the [Option] Soft key [] at the left of Total Message List to select the following menu.

- **Forward**: Sends the received message to others.
- **Edit**: Edits the received messages for sending.
- **Delete**: Deletes the selected message.
- **Delete All**: Deletes all messages in the Inbox.
- **Reply**: Writes and sends a new message with the received number.

Select a message and select the [Option] Soft key [] at the left to select the following menu.

- **Forward**: Forwards the received messages to others
- **Edit**: Edits the received messages.
- **Cut Objects**: Saves the object in the received messages.
- **Cut Numbers**: Selects any number in the received messages.

Select a function from View to extract and list up numbers in the messages. Press the [Save] Soft key to add each number to the new or existing Contacts entry.

- **Cut URLs**: Selects a function from View to extract and list up URLs in the message. Press the [Save] Soft key to add it to Bookmark.
- **Move to Saved Box**: Saves the selected messages in Saved Box. The old message will be deleted.
- **Delete**: Deletes the selected message.
- **Return Call**: Makes a call to the sender.
- **Reply**: Writes and sends a new message with the received number..

1.1.4 Outbox

Select ' Menu>1.Messages>1.Text Messages>3.Outbox'.

The Outbox saves the message that you have sent or saved without sending.

Select the [**Option**] Soft key [] at the left of Total Message List to select the following menu.

- **Edit**: Edits the message and sends it.
- **Delete**: Deletes the message.
- **Delete All**: Deletes all messages in the Outbox.
- **Resend**: Sends the failed message again.

Select a message and select the [**Option**] Soft key [] at the left for the associated options.

- **Edit**: Edits the message.
- **Move to Saved box**: Moves the messages to Saved Box. The old message will be deleted.
- **Delete**: Deletes the message.
- **Resend**: Sends the failed message again.

1.1.5 Saved Box

Select ' Menu>1.Messages>1.Text Messages>4.Saved Box'

The message in the Saved Box comes from Inbox or Outbox, or the draft message. All messages keep their feature when it was created and all options are applicable.

1.1.6 Text Templates

Select ' Menu>1.Messages>1.Text Messages>5.Text Templates'.

By default, 5 templates are provided. You can add 10 more but you cannot delete the default (pre-loaded) templates.

Select a text template menu and select the [**Option**] Soft key [] at the left for the associated options.

- **New**: Makes a new template. Not available if template space is full.
- **Delete**: Deletes a template you have defined.
- **Edit**: Edits a template.

Press the [**OK**] key to save the edited template.

Select a message and press the [**OK**] key, and then select the [**Option**]

Soft key [] at the left for the associated options.

- **Send**: Refer to Write New.
- **Delete**: Deletes a template.
- **Edit**: Edits a template.

Press the [OK] key to save the edited template.

1.1.7 Settings

Select ' Menu>1.Messages>1.Text Messages>6.Settings'.

You can set up default SMS information using this menu with the following options.

- **Message Centre**: Allows you to store or change the number of your SMS centre required when sending a message. You must obtain this number from your service provider.
- **Message Lifetime**: Allows you to set the duration of message storing at the message centre while attempting to deliver it.
- **Message Type**: Allows you to set the message type to **Normal**, **Fax**, **Voice Mail**, **ERMES**, **Nation' I Paging**, **X.400**, or **Internet**.
The network will convert the messages into the selected format.

1.1.8 Memory Info

Select ' Menu>1.Messages>1.Text Messages>7. Memory Info'.

Select Memory Info and press the [OK] key to display the free SIM memory space (Inbox and Outbox) and Saved Box (Phone Memory).

1.2 Multimedia Messages

Select ' Menu>1.Messages>2. Multimedia Msgs'.

Multimedia Message Service (MMS) is a messaging service quite similar to the Short Message Service (SMS). It provides asynchronous delivery of personal multimedia messages between phone and phone, and phone and e-mail.

Adding to the familiar text content of the text message, the multimedia message can contain image, graphic, and/or sound.

The MMS message is a separate multimedia presentation in a single entry, not the attachment to the text file.

Using the MMS feature, your handset can receive a multimedia message and/or send a picture message, depending on availability of your service provider. Only the handset that supports the multimedia message feature can receive or display the multimedia message.

Managing memory

When the New message icon () appears on the display, you have to retrieve messages in the Inbox. It disappears when you finish retrieving a new message.

If you cannot receive any new message, you must delete one or more old messages to free memory, using the [**Delete**] option within the Inbox, Outbox, Saved box, or the [**Delete All**] option.

Notes Multimedia message boxes, Camera, Java, and Media Gallery

share a given amount of memory in your phone. You can also use the [**Delete**] or [**Delete All**] option to delete some sounds or images in Camera, or Media Gallery.

- **Write New**: Writes a new MMS.
- **Inbox**: Displays the received message and saves it in the handset memory.
- **Outbox**: Displays the sent or draft message and saves it in the handset memory.
- **Saved box**: Saves the messages from Inbox and Outbox in the Saved Box of the handset memory.
- **MMS Templates**: Displays basic templates
- **Settings**: Sets up the MMS environment.
- **MMS Profiles**: Sets up the MMS profile.
- **Memory Info**: Indicates the free handset memory.

1.2.1 Write New

Select ' Menu>1.Messages>2. Multimedia Msgs.>1. Write New' and press the [**OK**] key.

Slide page information will be displayed on the top right corner.

You can add, edit, replace, or delete objects or templates to MMS with the following option.

This menu option allows you to create a new multimedia message and then send it to several receivers..

Press the [**Add**] Soft key and select one of the following options using the [**Up/Down**] key.

- **Add Text**
Enters a new message. For further details, refer to the Entering the Text menu.
- **Add Image**
Adds an image in Image Gallery. Press the [**OK**] key to select the image when the image list appears. For further details, refer to the Image Gallery menu.
- **Add Sound**
Adds a sound in Sound Gallery. Press the [**OK**] key to select sound when the sound list appears. For further details, refer to the Sound Gallery menu.
- **Add Photo**
Adds a photo in Photo Gallery. Press the [**OK**] key to select the phone when the photo list in each folder appears. For further details, refer to the Photo Gallery menu.
- **Take a Photo**
Adds a new photo by taking a photo using the camera feature. For details about camera feature, see the Camera menu.
- **Add Template**
Adds the MMS template messages. This feature is available only when no item is in the slide. With more than a slide, Add

Template will not be available.

- **Add Slide**
Adds a new slide page to create more slides. You can move to each slide page using the [**Left/Right**] key on the message composer screen. If there is more than, [**Delete Slide**] will be added in the option

Press the [**Option**] Soft key [] to use the following options.

- **Preview**
Shows the message as the way it appears on recipient's handset.
- **Slide Timing**

4.4 Java

You can download and execute the java application on your handset. The java application for a mobile handset is called a Midlet. Use the WAP browser to search a Midlet and download it for installation.

* The Midlet is not installed in the current model. Please download it if you want.

4.4.1 View of Java Application List

Select '4.Fun &Tools > 4. Java' in the menu to select a Java menu. Select '1. Midlets List' to view the Java Application list stored in your handset.

4.4.2 Java Application Execution/Deletion/Information Search

Select '4.Fun &Tools > 4.Java' in the menu to select a Java menu. Select '1. Midlets List' to view the Java Application list stored in your handset. Press the Navigation key to select an application. MENU has an option to control the Midlet.

To

Press the

Run the Midlet	Press the [Option] Soft key  and select the [Run] Soft key, or press the [OK]
View Detail Information	Press the [Option] Soft key  and select the [Info] Soft key , or press the  Soft key.
Delete the Midlet	Press the [Option] Soft key  and select the [Delete] Soft key

4.4.3 View of Java Application Memory

Select '2.Memory Info' to see the memory used

4.5 Auto Answer

The Auto Answer function works like the automatic answering machine. It sends the recorded message to the caller if you don't answer the call for the specified period of time.

4.5.1 Auto Answer

Set Auto Answer to [On/Off]. If set to [On], the Auto Answer function will be enabled.

4.5.2 Recorded Message

Displays a list of recorded messages during call active (In call). Each list displays the recorded date & time of the file. Press the [Delete] Soft key to delete the message in the View list, and press the [Send] key to make a call using the caller ID.

4.5.3 Response Message

Depending on your current situation, different answering message will be played back, including [Absent/ Meeting/ Driving/ User Message]. The User Message is the voice message of the local user that will be answered in the standby mode.

4.5.4 Response time

Sets the automatic answering time (3 Secs/ 5 Secs/ 10 Secs/ 20 Secs). When the response time elapses without answering the incoming call, the recorded message will be sent to the caller. If the caller decides to leave a

voice message, recording will be started with beep sound.

4.5.5 User Message

Displays your voice message set for the response message. Press the  key for playback. If no message is recorded, only the recorder function will be used.

4.6 Voice Memo

The Voice Memo function records your voice message. You can use Record, Stop, Play, and Save for voice recording and playback. You can use the Text Editor for title input.

Record

Select New from the option menu and press the  key.

Press  to terminate the recording process and press the [Play] Soft key to hear the recorded data.

Press , input a name, and press the [OK] Soft key to record data.

* **Tip:** When the memory is full, the “Not Enough Memory” message will appear and returns to the upper menu.

Play

Select an item and press  to start play immediately.

Press the [Option] Soft key [] to;

- **Delete**: Deletes the selected voice memo.
- **Delete All**: Deletes all voice memos.
- **Rename**: Renames the voice memo.
- **New**: Creates new voice memo.

5. Profiles

Select 'Menu>5.Profiles' or press the [] key in the standby mode. Profiles defines how your handset reacts when you receive a call or a message, how your keypad sounds when you press a key, and more. Ring tone, key tone, and other settings for each of the five available profiles can be used by their default setting, or customized to your needs. Select and customize the most suitable profile to your preference, such as when you are in a meeting or outdoor. The profiles available are **Normal, Silent, Meeting, Outdoor** and **Car**.

5.1 Ring Tone

Select 'Menu>5.Profiles >1. Ring Tone' and press the [OK] key, or press the [] key and [OK] key in the standby mode and select '1.Ring Tone'.
* You can choose the preferred ring type and melody to ring and ring volume.

- **Ring type:** Ringing, Vibration, Vib then ring, Vib and Ring, Ascending, None(Quiet)
- **Ring Volume:** Controls the volume by 7 levels
- **Sound:** Sound is composed of several groups such as **Melody Sound, Bell Sound, Voice Sound**, and **3D Sound** and each Group has multi tones. **User Sound** presents the melody of '4.Fun & Tools -> 2.Media Gallery -> 4.Sound Gallery' in consequence.

5.2 Message Alert

Select 'Menu>5.Profiles.>2.Message Alert' and press the [OK] key, or press the [] key and [OK] key in the standby mode and select '2.Message Alert' .

You can select the preferred alerting melody, its volume and reminding period when you have new messages.

- **Reminder:** Use the [Left/Right] key to select one out of **Off, Once, Every 2 Mins, Every 5 Mins**.
- **Sound:** Use the [Left/Right] key to set Message Alert Tone to **Bell1, Bell2, Bell3**.

5.3 Key Tone

You can select the keypad sound to be used for dialing or in the menu screen.

Select 'Menu>5.Profiles>3.Key Tone' and press the [OK] key, or press the [] key and [OK] key in the standby mode and select '3.Key Tone'.

- **Tone Type:** You may turn the key tone on or off.
- **Ring Volume:** Controls the volume by 7 levels.
- **Sound:** Selects a key tone.

5.4 Flip Open Tone

You can select a sound effect when you open or close the folder.

Select 'Menu>5.Profiles.> 4.Flip Open Tone' and press the [OK] key, or press the [] key and [OK] key in the standby mode and select '4. Flip Open Tone'.

- **Tone Type:** Turns the key tone on or off.
- **Ring Volume:** Controls the volume by 7 levels.
- **Sound:** Sets Bell1, Bell2, Bell3 to Flip Open/Close Tone.

5.5 Sound Effect

Turns on or off the default sound effect.

Select 'Menu>5.Profiles.> 5Sound Effect' and press the [OK] key, or press the [] key and [OK] key in the standby mode and select '5.Sound Effect'.

- **Menu Moving:** When you change a menu with the Navigation key.
- **Power On & Off:** When you turn the power on or off.
- **Option Popup:** When you press the [] key to see the popup window.
- **Call Connection:** When you dial or hang up.
- **WAP Connection:** When you connect or terminate WAP.
- **Hour Alert:** A sound effect every hour.
- **Minute Minder:** A sound effect every minute while you are on a

phone call.

- **Popup Alert:** A warning, error, information or question sound effect.

5.6 Profile Name

Select a profile name menu from the Profile Sound editing screen to rename it manually.

5.7 Reset

Select the Reset menu from the Profile Sound editing screen and press [Yes] to initialize all the sound related values in the profile.

6. Settings

Select 'Menu>6. Settings'.

You can set up various handset functions at your choice in the settings menu.

6.1 Display Settings

Select 'Menu>6.Settings>1.Display Settings'.

You can change the image or colour of the display composition at your choice or by necessity.

6.1.1 Main Screen

Select 'Menu>6.Settings>1. Display Settings>1.Main Screen' and press the [OK] key.

You can change the background image of the main screen.

- **My Wallpaper:** Sets up Wallpaper by "My Wallpaper". My Wallpaper stores items used to set up Wallpaper at Photo Gallery/Image Gallery. Other wallpapers than the default one may be deleted by the [Delete] Soft key. (The default one cannot be deleted permanently.)
- **Wallpaper Type:** Digital Clock 1/ Digital Clock 2/Analog Clock 1/ Analog Clock 2/Calendar/Greeting/D-day

6.1.2 Sub Screen

Select 'Menu>6.Settings>1. Display Settings>2.Sub Screen' and press the [OK] key.

You can change the background image of the sub screen.

- **My Wallpaper:** Sets up Wallpaper by "My Wallpaper". My Wallpaper stores items to set up Wallpaper at Photo Gallery/Image Gallery. Other wallpapers than the default one may be deleted by the  key (The default one cannot be deleted permanently.)
- **Wallpaper Type:** Digital Clock/Analog Clock 1/Analog Clock 2

Select 'Menu>6.Settings>1.Display Settings>3.Style Theme' and press the [OK] key.

Press the [Left/Right] key to set up 'Icon Style' or 'Dynamic Style'. And Press the [OK] Key to save.

6.1.4 Greeting

Select 'Menu>6.Settings>1.Display Settings>4.Greeting' and press the [OK] key.

You can set up the greeting message during startup or standby mode.

6.1.5 Back Light

You can set up the 'Back Light'.

Press the **[Left/Right]** key to change the value that is displayed when you select 'Menu>6.Settings>1.Display Settings>5.Back Light' and press the **[OK]** key.

6.1.6 Service Light

This menu displays the On Service status in the external LED. You can set up the colour at your choice in this menu. (Green / Red / Yellow / Cyan / Violet / White/ Blue)

Select 'Menu>6.Settings>1.Display Settings>6.Service Light' and change the value with the **[Left/Right]** key, and then press the **[OK]** key.

6.1.7 Voice Light

Select 'Menu>6.Settings>1.Display Settings>7.Voice Light' and select the one of On/Off, and then press the **[OK]** key.

6.1.8 Software Version

Select 'Menu>6.Settings>1.Display Settings>8.Software Version' and press the **[OK]** key. Then you can see the software version.

6.2 Call Settings

Select 'Menu>6.Settings>2.Call Settings'.

6.2.1 Call Divert

Select 'Menu>6.Settings>2.Call Settings>1.Call Divert'.

You can divert the received call to another phone number with this menu.

You may choose one from All Calls, When Busy, On No Answer, or When Not Found, all of which share the same basic flow.

Ex) All Calls

- **Activated:** Selects 'Activated' to convert all the services from the network such as Voice Calls, Data, Fax, and Messages. Input a number and press the **[OK]** key to transmit the setup value to the network.
- **Deactivated:** Deactivates Divert.
- **Status:** Displays the current setup status
- **By Service:** If your network supports such function, you may divert a specific type of call into another number. "All Services" can divert all the calls or select one from Voice Calls, Data, Fax,

and Messages. Select “All Except Msgs” to divert all but Message Service.

- **Cancel All:** Cancels all call diversion.

6.2.2 Answer Type

Select ‘Menu>6.Settings>2.Call Settings>2. Answer Type’.

You can set up the call receiving method.

Use the [Left/Right] key to set the call receiving method. And Press the [OK] Key to save.

- **SEND Key:** You can answer the incoming call by pressing the

[] key.

- **Any Key:** You can answer incoming calls by pressing any key,

except the [] key and the [Reject] Soft key.

- **Flip Open:** You can answer incoming call by opening the phone flip_
- **Auto Receive:** Your handset automatically answers calls after 10 seconds. This feature is available only when the handset is connected to the ear jack.

6.2.3 Auto Redial

Select ‘Menu>6.Settings>2.Call Settings>3.Auto Redial’.

This is an Auto-redial function in case of call drop.

- **On:** Sets up Auto Redial
- **Off:** Cancels Auto Redial.

Sets alarm bell to ring at a preset time.

Press the [Set] Soft key to input a time and minute for countdown and press the [OK] key for setup.

Press  after input and the displayed time will be counted down. Now, press  to pause countdown and press  to restart countdown.

After the preset time, an additional animation and alarm sound will be provided. Press the [Stop] Soft key to pause both.

Press the [Set] Soft key to return to the initial state while Timer is out of operation.

. Advanced

1. WAP
2. Infrared Port
3. SIM Toolkit

1. WAP

You can access to the Internet with a WAP (Wireless Application Protocol) browser.

That means you can connect to Internet at anywhere and anytime.

The descriptions below can vary according to your Network provider.

Therefore, ask your Network provider for detailed information.

Note: Press short the **[OK]** key to access the WAP menu directly.
Press long the **[OK]** key during standby to proceed to WAP homepage.

1.1 Navigating the WAP Browser

To scroll through and select browser items, press the **[Up/Down]** key until the item you want highlights, and then press the **[Select]** Soft key.

To return to the previous page, press the **[C]** key.

To return to the startup homepage, select **[Option]**> Home.

1.2 Entering the Text in the WAP Browser

When you are prompted to enter text, the current text input mode appears above the right Soft key.

Refer to the 'Entering the Text' for details.

1.3 Home

This menu contacts the network to load the Wireless Web service provider homepage.

1.4 Resume

You can reconnect to the latest web site.

1.5 Bookmarks

You can bookmark Internet address using the WAP browser just as you do with a PC Internet browser.

To register URL and Name in the selected number of Bookmark List, press the **[Add]** Soft key on the right.

Press the **[Option]** Soft key [] to;

- **Edit:** Edits the URL and name of a bookmark
However, this feature will not be available if a default bookmark is provided by the manufacturer.
- **Delete:** Deletes a bookmark from List.
However, this feature will not be available if a default bookmark is provided by the manufacturer.
- **Send Message:** The bookmark URL automatically composes the

SMS message text.

- **Go:** Goes to related site

1.6 Push Messages

Mobile can receive Push Messages from Service Provider.

1.6.1 Inbox

The Push message is stored in Inbox. Select and check a message from the message list of Inbox to contact the WAP page concerned.

Press the [**Option**] Soft key [] to;

- **Delete:** Deletes a message.
- **Delete All:** Deletes all the messages in Inbox.
- **Go to:** Goes to related site.

1.6.2 Receive Mode

Sets up Push Message receiving.

- **Accept All:** Receives all Push messages
- **Trusted Only:** Chooses out reliable message only.
- **Accept None:** Rejects all messages

1.7 Go to URL

This menu leads you to a URL as you input.

1.8 Profiles

Selects or edits a Connection Profile supplied by the phone.

Select a Profile List and press the [**OK**] key for setup.

Unedited Profile will not be selected.

Select a Profile List and press the [**Edit**] Soft key to edit the Profile.

- **Profile Name:** Sets Profile Name
- **Home URL:** Sets access Homepage URL to access
- **GSM Settings:** Sets up GSM network proxy.
 - Gateway (IP Address, IP Port, Login ID, Password)
 - Data Call Type: ISDN / Analogue
 - Dial Number
 - Login ID
 - Password
- **GPRS Settings:** Sets up GPRS network proxy.
 - Gateway (IP Address, IP Port, Login ID, Password)
 - APN: enters the Access Point Name
 - Login ID
 - Password
- **Bearer:** You can select the bearer type for each type of network access.
 - GPRS Only / GSM Only
- **Reset Profile:** Resets the selected profile.

1.9 Cache

1.9.1 Cache Mode

Sets up the Cache memory check.

- **Always Check:** The Cache is always checked whenever URL is loaded or URL is navigated.
- **Never Check:** The Cache is never checked.

1.9.2 Clear Cache

This menu provides the function to clean the data stored in the Cache (recently visited WAP pages).

1.10 Version

This function is to view the software version of the WAP browser

2. Infrared Port

Provides the function to change the current status of Infrared port.

- **Internet Connection:** Uses Infrared port for GPRS Modem purpose (Only some menus and functions are accessible.)
- **PCSync Connection:** Connects to PC Sync with Infrared port. (Only some menus and functions are accessible.)
- **Deactivate:** Deactivates the Infrared port

Note: WAP connection or Fax service through the infrared port is not supported. Depending on the specific Windows platform and system, you may not be able to connect.

For details, see the PCSync Guide Manual to use various functions through the Infrared Port.

3 SIM Toolkit

This menu can vary depending on SIM and the network services.

Access Code

The following section describes various security codes.

PIN code (4 to 8 digits)

The PIN (Personal Identification Number) code protects your SIM card against the unauthorized use. The PIN code is usually supplied with the SIM card. If you input the incorrect PIN code entry for three times in a row, the PIN code will be blocked. If the PIN code is blocked, you need to unblock the PIN code before you can use the SIM card again. See the information on the PUK code.

PIN2 code (4 to 8 digits)

The PIN2 code, supplied with some SIM cards, is required to access to some functions, such as call cost counters.

Lock code (4 digits)

The lock code can be used to lock the handset and keypad to avoid unauthorized use.

Note: The factory setting for the lock code is **1234**. To avoid unauthorized use of your handset, change the lock code. Keep the new code secret and in a safe place separate from your handset.

PUK and PUK2 codes (8 digits)

The PUK (Personal Unblocking Key) code is required to change a blocked PIN code. The PUK2 code is required to change a blocked PIN2 code. If the codes are not supplied with the SIM card, contact the

operator whose SIM card is in your phone for the codes.

You can change the following codes: Lock code, PIN code, and PIN2 code. These codes can include the numbers from 0 to 9 only.

Note: Avoid using access codes similar to the emergency numbers, such as 112, to prevent accidental dialing of the emergency number.

Call Barring Password (4 digits)

The call barring password is required when you use the Call Barring function. You obtain the password from your service provider when you subscribe to this function.

You can change this password using the **Call Barring** menu option. For further details, see menu 6.7.6.

Check List

If you experience any problem while using your cell phone, please refer to the following checklist. If the problem still persists, contact your dealer or nearest service centre.

When the “Insert SIM Card” message appears:

Make sure the SIM card is correctly installed. Check to see if the SIM card is working properly. If it does not work, try to clean the contact point of the card. If it is out of order, take it to the nearest service centre.

When the “Handset locked enter password” message appears:

Enter the handset password. If you cannot remember the password, contact the nearest service centre.

When the “Enter PIN1” message appears:

Input PIN1. If you cannot remember it, contact the nearest service centre. You can still receive calls even if your cell phone becomes locked by entering the incorrect PIN1 on three consecutive attempts.

When the “No service” or “Network failure” message appears:

Check the SSI (Signal Strength Indicator) state. If you cannot make a connection in underground areas or in buildings where signal strength may be low, try moving to another place. If you still cannot make a connection, contact the nearest service centre.

When audio quality is poor:

End a call and try again.

When the other party cannot hear you speaking:

Your handset may be set to MUTE. Disable the MUTE function.

When battery lifetime is shorter than usual:

This may happen when you are in an area with low signal strength. Turn off your handset when it is not in use. Change the battery when battery energy is exhausted.

When your cell phone does not turn on:

Make sure your battery is charged. Check to see if your phone works while recharging the battery.

When you are unable to send a message:

Either you are not registered to receive SMS service, or you may be in an area where your network service provider cannot provide such service.

When you are unable to make a call:

Your phone may be set to “fixed dial.” Cancel the “fixed dial” function.

When you are unable to charge the battery:

This may be the result of one of the following three cases.

1. Your charger may be out of order. Contact your nearest dealer.
2. You may be attempting to use the phone in overly hot/cold temperature.

Try changing the charging environment.

3. Your battery may have not been connected to the charger properly. Check the connector.

When you are unable to input data into the Phone Book:

Your Phone Book memory may be full. Try deleting some entries from your Phone Book.

When you are unable to select a certain function:

You may not be subscribed to that function, or your network service provider may be in an area where such service cannot be provided. Contact your local service provider.

All about performance and safety

The following list shows how to maintain your cell phone along with precautions.

- Keep your cell phone and its accessories out of the reach of children.

- Maintain your cell phone in dry condition and keep it under normal temperature. Temperatures higher than 55 C (131 F) or lower than -20 C (-4 F) may damage your phone.
- Do not use or store your cell phone in dusty, dirty areas.
- Do not attempt to disassemble your cell phone.
- Do not drop or cause severe impact to the phone.
- Do not use chemical products, cleaning solvents or detergents to clean your cell phone.
- If your cell phone does not work properly, contact your dealer immediately.
- Use only authorized batteries, battery chargers and accessories. Any malfunction or damage caused by the use of unauthorized batteries, battery chargers and accessories will void the limited product warranty.
- Ensure that the grounding points of the battery and battery charger are not in direct contact with conductive objects.

Glossary

To help you understand the main technical terms and abbreviations used in this booklet and take full advantage of the features of your mobile phone, here are a few definitions.

Call Barring

Ability to restrict outgoing and incoming calls.

Call Diverting

Ability to reroute calls to another number.

Call Holding

Ability to put one call on standby while answering or making another call; you can then switch between the two calls, as required.

Call Waiting

Ability to inform users that they have an incoming call when engaged on another call.

CLI (Caller Line Identification) Services

Services allowing subscribers to view or block the telephone numbers of callers.

EMS (Enhanced Message Service)

Network service sending and receiving messages that include images, sounds and animations to and from another user without having to speak to the correspondent.

GPRS (General Packet Radio Service)

New non-voice value-added service that allows information to be sent and received across a mobile telephone network. GPRS guarantees continuous connection to the Internet for mobile phone and computer users. It is based on the Global System for Mobile Communication (GSM) circuit-switched cellular phone connections and the Short Message Service (SMS).

GSM (Global System for Mobile Communication)

International standard for cellular communication, guaranteeing compatibility between the various network operators. GSM covers most European countries and many other parts of the world.

Multiparty Calling

Ability to establish a conference call involving up to five additional parties.

PIN (Personal Identification Number)

Security code that protects the phone/SIM against unauthorized use. The PIN is supplied by the service provider with the SIM card. It may be a four to eight-digit number and can be changed, as required.

PUK (PIN Unblocking Key)

Security code used to unlock the phone when an incorrect PIN has been entered three times in succession. The eight-digit number is supplied by the service provider with the SIM card.

Roaming

Use of your phone when you are outside your home area (when travelling for example).

SIM (Subscriber Identification Module)

Card containing a chip with all the information required to operate the phone (network and memory information, as well as the subscriber's personal data).

The SIM card fits into a small slot on the back of the phone and is protected by the battery.

SMS (Short Message Service)

Network service sending and receiving messages to and from another subscriber without having to speak to the correspondent. The message created or received can be displayed, received, edited or sent.

Soft Keys

Two keys marked and on the phone, the purpose of which:

- varies according to the function that you are currently using
- is indicated on the bottom line of the display just above the corresponding key

Voice Mail

Computerized answering service that automatically answers your calls when you are not available, plays a greeting (optionally in your own voice) and records a message.

This device contains 1800 MHz GSM functions that are not operational in U.S. Territories. This filing is only applicable for 850 /1900 MHz PCS operations.

FCC & Industry Canada Regulatory Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Your mobile device is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for mobile device. Those guidelines are consistent with safety standards previously set by both U.S. and international standards bodies: American National Standard Institute (ANSI), National Council of Radiation Protection and Measurements (NCRP), and International Commission on Non-Ionizing Radiation Protection (ICNRP). Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. The design of your Module complies with the FCC guidelines and applicable

Statement according to FCC part 15.105

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause

harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which user's authority to operate the equipment. can be determined by turning the user is encouraged to try to correct the interference by one or more of the following measures:

- . Reorient or relocate the receiving antenna.
- . Increase the separation between the equipment and receiver.
- . Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- . Consult the dealer or an experienced radio/TV technician for help.

Statement according to FCC part 15.21

Modifications not expressly approved by this company could void the user's authority to operate the equipment.

RF exposure FCC

For body worn operation, to maintain compliance with FCC RF exposure guidelines, use only accessories that contain no metallic components and provide a separation distance of 15mm (0.6 inches) to the body. Use of other accessories may violate FCC RF exposure guidelines and should be avoided.

This device and its antenna must not be co-located or operating in

conjunction with any other antenna or transmitter.

Health and Safety Information FCC

This EUT has been shown to be capable of compliance for localized specific absorption rate (SAR) for uncontrolled environment/general population exposure limits specified in ANSI/IEEE Std. C95.1-1992 and had been tested in accordance with the measurement procedures specified in FCC/OET Bulletin 65 Supplement C (2001) and IEEE Std. 1528-2003 (Dezember 2003).

Ministry of Health (Canada), Safety Code 6. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg *.

* In the U.S. and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in.
