Hi Chris,

Thank you for your comment.  
Please find the attachment file and replies are embeded below your questions.  
Should you have any further questions, please let me know.

Best Regards,  
SunHee Kim

> Dear SunHee Kim,

>

> You are listed as the Technical Contact for the above referenced TCB application. The following item(s) need(s) to be resolved before the review can be continued:

>

> The Operational Description mentions that the MSM7227 chipset supports HSUPA, but does not clearly state if this handset device is capable of HSUPA operation. Please confirm.

==> [This EUT doesn't support the HSUPA function.](#)

>

> FCC KDB 450824, page 3, there are additional steps that should be performed when the SAR measurement frequency is >50MHz from the SAR probe calibration frequency. SAR probe S/N: 1798 has a calibration for Head fluids at 900MHz, which is greater than +/-50MHz from the 824.2 MHz and 826.4 MHz bottom channels. Please follow the guideline of this FCC KDB for the additional Measurement Uncertainty considerations.

==> [Please find the attachment SAR Probe Conversion file.](#)

> The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
