

Modulation Characteristics: FCC Part 24, Subpart D, 24.131 FCC Part 90, Subpart I, 90.211

- **Test Conditions**

The @ctivelink module was positioned standing on its right side. This position was determined to have the worst case emissions. The HP modulation domain analyzer was configured to have a span of 6.4kHz. An acknowledgement transmission, which is representative of all transmissions from the module, was captured on the modulation domain analyzer.

- **List of Test Equipment**

1. Modulation Domain Analyzer, Hewlett Packard, Model No. 53310A, S/N KR93200189.
Calibration date: April 27, 2000. Calibration due date: April 27, 2001.
