American TCB  
6731 Whittier Ave., Suite C110  
McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a Mobile approval of an intentional licensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 & 25 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2, 15, and 25 of the Code of Federal Regulations.

This is a Mobile approval of the S-Band Satellite Modem (MN: ICO MCAP User Equipment, FCC ID: K3YHNS0100), which is an Ancillary Terrestrial Component satellite modem operating in the S-Band (2000 - 2020 MHz (Tx) / 2180 - 2200 MHz (Rx)). It was tested connected to a Hughes Network Systems antenna with four RF cables. The satellite modem is powered by a 12vDC vehicle supply. The antenna is powered by a DC feed from the satellite modem via the DVB/GRM port through 1 of the RF cables.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas".
