RE: FCC ID: K3YHNS0100\_ATCB007197

Attention:

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please disassemble the device sufficiently to show top and bottom of all boards in the EUT. Currently the internal photos do not show all sides of all boards.
2. Please provide a label sample that includes the FCC ID number.
3. Please note that the operational description, while giving certain information about the location of the device and the overall configuration in a mobile setup, and while the amplifier information give adequate information on the amplifiers, the current documentation does not provide much on the actual operational description of the transmitter itself. Please explain and provide a more adequate description of the transmitter.
4. Please note that while a tune up procedure has been provided, the other document in the parts list directory "Confidential\_antenna\_TX\_path" there is no actual parts list. Please note that this is a required exhibit. Please provide the parts list for this device. If the schematics are to be used as the parts list, please clarify.
5. Please correct the 731 to show the lower and upper center frequencies instead of the entire band.
6. Please note that I do not see modulation content in the emissions mask plots. Please verify that the device was properly modulated during this test. Please explain the modulation applied.
7. Please note that part of the application states that Part 15 is also in the submittal. However, there are no test data for part 15. Is this a part 15 verified device? Please explain.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Except as described in §0.459, correspondence and responses should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
