1. The 15.247 report needs to demonstrate compliance with the 15.203 antenna requirements. The report should also indicate what type of antenna is used.

Intertek - Comment was added to the Note of Section 3.4 to indicate this is compliance with 15.203.

2. The output power listed in the IC information is not correct. The highest reported power is 0.99dBm which is approximately 1.25mW.

Intertek - Changed the rated RF power output and date of IC application (16) and (22).
