Product Description

The SHSDT-1 is an advanced smoke detector with wireless RF transmission capability specifically designed as an accessory smoke detector that can be integrated with the NeighborLink-1 system.

Basically the smoke detector is designed to sense smoke that comes into the detector chamber. It does not sense gas, heat, or flame. This smoke detector is designed to give early warning of developing fires by giving off the alarm sounds from its built-in alarm horn, and if integrated with NeighborLink-1 system, it will simultaneously activate the NeighborLink-1 system as well. It can provide precious time for you and your family to escape before a fire spreads. However, the smoke detector makes such pre-warning of fire accident possible, only if the detector is located, installed, and maintained properly as described in this Owners Manual.

Characteristics of Device:

- Operates on 9-volt battery
- Equipped with a loud 85 decibel (at 10 ft.) alarm
- Equipped with a wireless RF transmitter that uses 315MHz radio band for transmission.
- Red LED indicator light flashes once every 45 seconds during operation (in ready mode).
