

2) Yes, it was tested in 3 orthogonal planes, and only the worst case datas were put into the final certified report for TIMCO submission.

3) Antenna Type for 27MHz testing: Pls see the data as shown below---

- a) Brand: EMCO
- b) Model 3142B
- c) S/N: 9904-1307
- d) Rating of its frequency range: 26MHz to 2GHz.

Hope this information is acceptable for FCC reviewing.  
Waiting for your further instructions.

Thanks with best regards,  
Rayson Nien, PEP Testing Lab.,
