RE: FCC ID: K6610854620
Model No. VX-231-AG6B-5 and BC95

Gentlemen:

We are requesting a Class II Permissive Change for our model numbers listed above with corresponding FCC Identifiers. These radios comply with the requirements of the FCC Part 90 regulations. The new models have no changes in the basic frequency determining circuitry including multiplication stages to them as the original ones filed. The only difference in the two models is the external microphone/jack has changed.

Programming of this product's transmit frequencies can be performed only by the manufacturer or by service or maintenance personal. The operator cannot be program transmit frequencies using the equipment's external operation controls.

Should you require additional information relating to these products, please do not hesitate to contact us. Thank you and we would appreciate your consideration.

Best regards,

A handwritten signature in black ink, reading 'Y. Tomita'.
