Re: FCC ID: K6620575X50

To Whom It May Concern:

We are requesting a Class II permissive change for the above listed FCC Identifier. This radio complies with the requirements of the FCC Part 15 regulations. This time, adding a model name and extended scope function.

Model	Function
FT-991	Original Scope function; Since the FT-991 has only one receiver the audio will be muted while the spectrum scope is scanning.
FT-991A	Adding a model Extended scope function; The FT-991A can operate scope function while listening to the receiving audio.

There have been no changes to the RF circuitry (frequency range, RF output power, and other RF characteristics)

Should you require any further information, please let us know.

Best regards,

Kouji Taguchi
