www.mflom.com general@mflom.com (480) 926-3100, FAX: 926-3598

Date: April 2, 2003
Applicant: Vertex Standard Co., Ltd.
Equipment: FCC ID: K66HX470S EA168547
Reference: Correspondence 25020

1. Reference Rule 80.871(d), which lists 156.025 to 157.425 MHz (Ch. 88) as the operating band of frequencies. The line item Form 731, 8(a) should show these frequencies for Part 80. The User Manual showing 156-163 MHz is a carry-over from the Frank Coperich days (remember him?) when he was 'in power'. He wanted to see this. Also please note that Rule 80.209(5) shows 156-162 MHz.
2. Frequency Plan Use: Please find the Table of Channels, frequencies, band use (uploaded to the Manual Exhibit). These will be listed in the Applicant's User Manual.
3. UHF Frequencies: Rule Part 80.215(e(3)) lists 458-468 MHz for ON BOARD STATIONS with an ERP of 2W. Rule Part 95.627(a) permits a frequency span of 462.5625 TO 467.7125 MHz with an ERP of 0.5 w. The Commission's e-mails of 6 Dec.02 (WTB & OET) permitted this combination.
4. Please find Compliance with Part 80.225(a) RTCM Requirements for DSC, as signed by the writer as Agent for the Applicant with their permission and authorization, uploaded to the Cover Letters Exhibit.

It is of the utmost importance that this Grant be reinstated as quickly as possible. Your cooperation with the U.S. Coast Guard to remedy this is respectfully requested.

Personal regards, Mort Flom, P. Eng., Agent for Applicant
