TO: Mr. Frank Coperich
FEDERAL COMMUNICATION COMMISSION

Subject: YAESU MUSEN CO. LTD. FCCID: K66VX-800U

REFERENCE: EA 95929

After the training session last week I decided to review all of our pending applications based on what was learned last week. Attached you will find several pages with corrected data. The corrections are;

1. The power output is average conducted power.
2. The radiated emission were retested using the TIA/EIA-603 test procedure.
4. The audio frequency response for 12.5kHz BW was re-plotted with same scales as 25kHz.
5. A photograph was taken with the shield removed.

If you have any other questions please let me know.

BEST REGARDS,

Sid Sanders
