Dear Sirs,

**FCC ID: K68ND2099A - Application for Certification of the Radiodetection
Dual Frequency Datasonde**

We wish to apply for certification of our Dual Frequency Datasonde (part number ND2099-DF-HP-1). The datasonde is part of our DrillTrack system, which is designed to provide guidance information for horizontal directional drill machines.

The datasonde is mounted in the drilling machine drillhead and transmits information on its pitch, roll position, temperature and battery status to a DrillTrack receiver. The information is transmitted at 8 kHz or 33 kHz.

The datasonde has been successfully tested by Radio Frequency Investigation Ltd (RFI), a UK test house, in accordance with the requirements of FCC Part 15 Subpart C. The RFI test report (serial number RFI/EMCB1/RP39213A) is entitled 'Test of: Radiodetection Ltd Dual Frequency Sonde 8' and records the results of tests on a representative sample of our ND2099-DF-HP-1 product.

Yours faithfully,

Dr Roger Lee
Principal Engineer (Approvals)
For and on behalf of Radiodetection Ltd.
