RE: Request to Supercede Document, FCC ID: K7GD301

To Whom It May Concern:

We would like to request the FCC to remove the manual exhibit listed as "3G Manual" from the database. This document was incorrectly labeled as a manual exhibit instead of an Operational Description exhibit. The Grantee believes this document holds confidential information and requests to resubmit the document as Operational Description which is covered under the current Confidentiality Request.

If any additional information is needed, please let me know.

Thank you for your quick response to this matter.

Regards,

Jennifer Sanchez TCB Administrator
