To Whom It May Concern:

PURPOSE OF CHANGE LETTER **For the Model: SX700**

I hereby confirm that the purpose of this application is to report changes in the original certified product of **SX700** for cost down version.

These models are identical in electrical and mechanical designs (i.e. RF circuit, Electrical Parameter and mechanical & cosmetics designs) except the Audio path IC (LM324) and MCU. The change is not intended for increase transmitter conducted output power.

The main modification is all Audio IC (LM324) and MCU (TMP86CH21 Die-JT5BU8, manufacturer is Toshiba) combined to ASIC IC (Die-EM78580, manufacturer is EMC). So the PCB layout is also changed.

And the weather band channels from 8 RF channels change to 11 RF channels, this change is software changed only, hardware does not change any component.

Should you have any query, please feel free to contact me.
