#### MEASUREMENT SETUP

The measurements were taken using a probe placed 15 cm (as worse case) surrounding the device and 20 cm above the top surface for all configurations on each individual coil per KDB 680106 D01. 1.85cm is compensated when measuring the 15cm or 20cm distance during testing.

E- field and H-field are evaluated at the center of the probe (which is 18.5mm above the surface of its tip).
