_ATCB007611

Dear Rich,

1. Please provide more information on the automatic transmissions from this transmitter. Neither the operational description nor the user manual exhibits contain any information on the automatic transmissions from this transmitter. Only the test report shows it transmits automatically every 35.6 seconds but there is no mention of how long each transmission lasts and how long these automatic transmissions continue. Both the FCC and IC have restrictions on the length of automatic transmissions and the silent time between each automatic transmission.

[MLT: the length of each transmission is 437.5ms and the silent time between each automatic transmission is 35.1 seconds.](#)

2. Please provide a description of the differences between each model number being approved for IC. If these model numbers are electrically identical, state so but also provide a description of the differences between each model number.

[MLT: had revised and upload file to ATCB website](#)

3. Please provide an IC label for all of the model numbers being approved in this application. Only a model number SKY-3301P2 is shown in the submitted label. IC requires a separate label for every model number being approved.

[MLT: had revised and upload file to ATCB website](#)

4. Please provide a letter to IC requesting confidentiality of the same exhibits that you want the FCC to hold confidential. A sample letter to IC is attached to this email. Be sure this letter bears a handwritten signature.

[MLT: had revised and upload file to ATCB website](#)

5. IC is now investigating whether the information for the Canadian Representative listed in an IC application is accurate. ATCB is suggesting that you provide a letter from the Canadian Representative that states they accept the responsibility for being the Canadian Representation on this application for IC: 2439A-3301P2 (See attached example letter from our application forms). This letter should be on company letterhead paper so IC can verify the company name and address. The letter should also contain the telephone number and fax number of the Canadian Representative listed on the IC application form and it should be signed by this individual. Please note that this is not a requirement for IC. It is merely a suggestion at this time. If you do not accept ATCB's suggestion, it may delay the appearance of this device on the REL in Canada because IC will check with the Canadian Representative before the device is listed on the REL in Canada. Providing the above letter may result in faster listing of this device on the REL in Canada. Please acknowledge if you do not intend to submit the above suggested letter.

[MLT: cause the time is rush, we will provide the document on next project.](#)

6. Please provide an amended IC application form that contains the following information:

- (a) a handwritten signature on pages 1 and 2 of the IC application form (IC requires handwritten signatures on the application form),
- (b) the type of service on page 1 should be New Family not Single,
- (c) the type of equipment on page 2 (use the pull-down menu on the ATCB form to select the equipment type that best describes this device – Remote Control Device is more accurate),
- (d) R. F. power in Watts should be left blank for low power devices whose limits are expressed as a field strength (The field strength entry below covers this item),
- (e) The emission designator should be filled out (this device uses a 99 % bandwidth of 31.55 kHz so the emission designator should be something like 31K6L1D. See TRC-43), and
- (f) The highest value of the transmitter spurious worst case emission (It is not the same value as the fundamental field strength).

[MLT: had upload file to ATCB website](#)

Regarding www.AmericanTCB.com application:

ATCB ID: ATCB007611

FCC ID: K9L3301P2

IC: 2439A - 3301P2

TCF:

Account name: MLTLAB

The attached contains a request for additional information on the above referenced application.

The other attachments are explained in the request for addition information.
