RE: FCC ID: KA22002040014-1  
Attention: Michael Chen

I have a few comments on this Application.

- 1 The internal photos are of poor quality. They do not allow clear view of the board when expanded. Please remember that you must be able to clearly identify main circuit components and traces. Please provide photos that are clear and which allow viewing of the main components and traces.
- 2 There appears to be two different antenna systems. One where the antenna goes straight out and another with the antenna at 90 degrees. Please verify that both antennae are of the same characteristics as described on page 6 of the report.
- 3 Please note that you have not provided the users manual. In place of the users manual you have uploaded a copy of the test report. Please provide the users manual with all appropriate FCC statements and cautions.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
