

Operational Description

This device is a 2.4GHz Wireless PCI Adapter which operates in 2.4GHz band, the maximum data rate could be up to 54Mbps which OFDM technique will be applied, and also, a turbo mode was provided to this EUT at freq. 2437MHz. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with CCK technique will be applied.

The transmitter of the EUT is powered by host equipment via a PCI interface. The antenna is dipole antenna with reverse SMA connector.

The other instruction, please have a look at the users manual.
