

## C2PC Letter

This is to request a Class II permissive change for **FCC ID: KA2CS2630LA1**, originally granted on **08/18/2015**.

The major change filed under this application is:

After engineering re-assessment, adding the same type of a 2.4G and 5G antenna that antennas gain is smaller than the original application. (Find below antenna table)

	Original 2.4G	Variant 2.4G	Original 5G	Variant 5G
Antenna type	Omni-directional	Omni-directional	Omni-directional	Omni-directional
Antenna gain	3.91 dBi	2.20dBi	4.5 dBi	3.5dBi

We verified the spurious emission that test results shown original data is worse than the new antenna, and also the antenna gain is smaller than the original, so there's no need to update DFS and RF reports.

All other hardware are identical with original granted.

Sincerely,

---
