RE: D-Link Corporation

FCC ID: KA2DI514G2

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The device utilizes a DoC label (assumed to be for the PC peripheral portion of the device). Current use of the DoC labeling under Part 15 still requires the use of "Tested To Comply With FCC Standards" and "FOR HOME OR OFFICE USE" statements. Please provide a revised label.

Note: The FCC has released changes to Part 15 which will make these statements no longer necessary. However these changes are not effective until 120 days after these changes have been published in the Federal Register, which has not yet occurred.

- 2) Page 56 of 60 of the users manual states that the output power is +15 dBm +/- 2 dBm. The measured power given in the test report/731 form was 16 dBm. Please note that the FCC expects the worse case power to be tested for purposes of FCC testing (15 dBm + 2 = 17 dBm). Please explain.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
