Using the Configuration Menu (continued)

This page displays the current information for the DWL-700AP. It will display the Ethernet and Wireless information. Ethernet: MAC Address IP Address Subnet Mask Gateway DHCP Server Wireless: MAC Address SSID Encryption Channel

The DWL-700AP keeps a running log of events and activities occurring on the Access Point. If the device is rebooted, the logs are automatically cleared. You may save the log files under **Log Settings**.

AP mode

To enable or disable logging for the Access Point, click on **Log Settings**. To monitor the wireless stations, select **Enable** and the log file will be sent to the associated computer.
