Dear Amanda,

Please answer the following questions.

By the way, this is a composite device filing, please check composite device and complete that section when you fill out Form 731.

Thank you,  
Helen

Question #1: The manual indicates that Transmit Power Output is 18dBm@5GHz, 20dBm @2.4GHz, which does not agree with the measurements listed on the test report. Does it average value? Please [explain](#).

**Ans:** The output power on [user manual](#) is average value.

Question #2: The manual indicates that "For operation within 5.15 ~ 5.25GHz frequency range, it is restricted to indoor environment, and the antenna of this device must be integral." Please note integral antenna is no longer required by FCC. You may want to update the user manual.

**Ans:** The user manual (on P30) had revised as attachment.

Best Regards,  
Helen Zhao

The items indicated above must be submitted before processing can continue on the above
