Overview

Class II permissive change to allow a new RF exposure condition with co-location in the GD8000 Laptop PC host device. The KBCIX-WT11 Bluetooth radio will be co-located with previously certified radios KBCIX-512AN and KBCIX-GOB12. MPE estimates have been submitted in support of these new co-located configurations.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
