**SUBJECT: ITRONIX CORPORATION
FCC ID: KBCIX100XAC555
Part 24(E) - Certification**

On behalf of Itronix Corporation is an application for Part 24 Certification of the IX100X Rugged Handheld PC with internal Dual-Band PCS/Cellular CDMA PCMCIA Modem (Model: AirCard 555/550 manufactured by Sierra Wireless, Inc.), utilizing a Nearson ¼-wave helix antenna, an Itronix IX100X vehicle cradle, and a MaxRad 3 dBi Gain vehicle-mount antenna.

Model: IX100XAC555
Device Class: PCS Licensed Transmitter worn on body (PCT)
Device Type: Rugged Handheld PC w/ Sierra Wireless AirCard 555/550 PCS/Cellular CDMA Modem, ¼-wave Helix Antenna, Vehicle Cradle, & MaxRad 3 dBi Gain Vehicle-Mount Antenna
Emission Designator(s): 1M25F9W
Frequency Tolerance(s): 150 Hz (PCS CDMA)
300 Hz (Cellular CDMA)
Tx Frequency Range(s): 1851.25 - 1908.75 MHz (PCS CDMA)
824.70 - 848.31 MHz (Cellular CDMA)
Max. Conducted Power Tested: 23.0 dBm (PCS CDMA)
23.0 dBm (Cellular CDMA)
Max. ERP/EIRP Measured: 0.313 Watts (24.96 dBm) EIRP - PCS CDMA - Nearson Helix Antenna
0.338 Watts (25.29 dBm) ERP - Cellular CDMA - Nearson Helix Antenna
0.078 Watts (18.93 dBm) EIRP - PCS CDMA - MaxRad Vehicle-Mount Antenna
0.080 Watts (19.05 dBm) ERP - Cellular CDMA - MaxRad Vehicle-Mount Antenna
Max. SAR Level(s) Measured: Body: 1.01 W/kg - 1g average (PCS CDMA)
Body: 1.00 W/kg - 1g average (Cellular CDMA)

Attached is the TCB Form 731, applicant's confidentiality request, Part 22/24 EMC measurement report data and photographs, SAR RF exposure measurement report data & photographs, MPE RF exposure evaluation report, FCC ID label and location, internal and external device photographs, schematic diagrams (confidential), parts list (confidential), tune-up procedure (confidential), operational description (confidential), antenna specifications, and the user manual with RF exposure information.
