

BAND EDGE MEASUREMENTS

Measurements of the CISCO MPI350 WLAN were made to determine Band Edge compliance. The plots on the top halves of the following two pages depicts the Peak 1MHz RBW and 1 VBW compared to the 74 dBuV limit of Part 15.209(a). The plot on the lower half of both pages depicts the 1 MHz VBW and 30 Hz Average measurement with respect to the 54 dBuV limit of Part 15.209(a).
