

## **BAND EDGE MEASUREMENTS**

Measurements of the CISCO MPI350 WLAN were made to determine Band Edge compliance. The plots on the top halves of the following two pages depicts the Peak 1MHz RBW and 1 VBW compared to the 74 dBuV limit of Part 15.209(a). The plot on the lower half of both pages depicts the 1 MHz VBW and 30 Hz Average measurement with respect to the 54 dBuV limit of Part 15.209(a).
