Re: FCC ID: KBCIX300AC555WLBT_ATCB001187

Dennis,

The following is in reply to your comments of today's date.

- 1.) Please hold the block diagrams confidential as the applicants intent was to have the term "Circuit Diagrams" to include the block diagrams. We will clarify this terminology in future confidentiality requests.
- 2.) The correct Operational Description for the WLAN has been uploaded
- 3.) Itronix will take a look at this issue as it can easily be addressed to avoid any possible concerns.
- 4.) The PCII report submitted is the most current conducted measurement data and would be applicable to the current version as there were some hardware revisions at that time as well. The Sierra Wireless report contains all of the applicable conducted test data. The CSC report covers only the ERP/EIRP only and the results do not apply to this host configuration with the IX300.
- 5.) Thank you for that information.

Thank you for your time spent reviewing this application.

Best Regards,

A handwritten signature in blue ink that reads "Rod Munro".
