**SUBJECT: ITRONIX CORPORATION  
FCC ID: KBCIX600-BT  
Part 15(C) - DSS  
Class II Permissive Change  
(Orig. Grant Date: 09/27/05)**

On behalf of Itronix Corporation is a Class II Permissive Change application for the FCC ID: KBCIX600-BT (Bluetooth Transmitter installed in IX600 Series Rugged Laptop PC) to add a co-located Dual-Band CDMA/EV-DO PCMCIA Modem (Model: V620 manufactured by Novatel Wireless, Inc.) utilizing an internal SkyCross meandering line antenna installed behind the LCD display. The CDMA/EV-DO PCMCIA Modem is previously certified in the IX600 Laptop PC with Limited Modular Approval under the FCC ID: KBCIX-NW620 and includes co-location with the Bluetooth FCC ID: KBCIX600-BT.

The Bluetooth and Dual-Band CDMA/EV-DO PCMCIA Modem can transmit simultaneously. Radiated spurious emissions measurements were evaluated for co-transmit operation and the results were in compliance. Co-transmit MPE calculations are included within this filing.

Submitted within this application is the TCB Form 731, applicant's agency authorization letter, co-transmit MPE RF exposure calculation data, FCC ID label(s) and location(s), internal and external device photographs, and the Radio-Specific Safety Information (provided to the user in hard copy format).

If you have any questions or comments concerning the above, please contact the undersigned.

Sincerely,

Jonathan Hughes  
General Manager  
Celltech Labs Inc.
