

USER OPERATION INSTRUCTION

KEYLESS ENTRY SYSTEM

This system uses coded radio signals to communicate with the vehicle and remote controller.

It allows the vehicle's door lock/unlock when the button pushed. It is possible to use the control entry function.

△ CAUTION

- Be sure to carry the remote controller.
- Don't leave the vehicle when the remote controller is in it.
- This system may not perform correctly depend on the environment or operation conditions, if you do not use it correctly.
 - The remote controller transmits the faint radio waves.
 - When there are strong signals coming from the television tower, the power station or the cellular phone.
 - When the remote controller is in contact with a metallic material or covered by it.
 - When another radio wave types of remote controller is used nearby.
 - When the remote controller is placed near an electric appliance such as a personal computer.
- The remote controller continually consumes battery power when it receives a signal to communicate with the vehicles.
- Battery life is about 3 years, although it varies depending on operation conditions. Please replace the new one if the battery runs down or power is low.
