RE: FCC ID: KBRTSTU50

Attention: Mr.Yoshiaki Iwasa / Ms.Yukie Koyama

I have a few comments on this Application.

- 1       ANSI C63.4 states, "A typical signal or an unmodulated CW signal at the operating frequency of the EUT shall be supplied to the EUT for all measurements." Your report is not clear as to the cohering signal used during testing of this receiver. Please clarify the source of the signal. I.e. was it a CW from a signal generator. The support equipment list would tend to say it was the transmitter, but this is not clearly stated.
- 2       The report indicates that the readings were QP because of the detector type used. Please verify that the radiated emissions data is QP or Peak.
- 3       Please note that no request for confidentiality was provided. This means that the schematics will not be considered confidential as indicated in the file name. If you wish these to be confidential, please provide a letter requesting confidentiality.
