Office of Engineering & Technology
Federal Communications Commission
Washington, D.C. 20554

Subject: Request for continuous confidentiality of technical information per
               Sections 0.459 and 0.457 (d) (2) (I) of CFR 47.

FCC ID: **KDYOMNDCT1**

To Whom It May Concern:

Paradox Security Systems is hereby filing this request for continuous confidentiality of the specified items submitted with the application for certification (Form 731) with proposed identifier **KDYOMNDCT1**

The technical documentation for which continuous confidentiality is sought is:

1. Schematic diagrams, PCB Layers
2. Components List (BOM)
3. Technical Description
4. Block Diagram

This technical documentation is a part of the material supporting the Form 731 application for certification, which this request for confidentiality accompanies. The schematic diagrams disclose proprietary information and technical data that Paradox Security Systems would guard from its competitors and would not make available to the public. This proprietary information constitutes a trade secret and is not a part of the product documentation that would be made available to the customers of Paradox Security Systems. It would be potentially injurious to Paradox Security Systems in the development of this innovative proprietary product to make available for public disclosure the trade secret technical information specified in this request.

If you have any questions or comments, please do not hesitate to contact me,

Marc Bertrand
Certification Manager
