Radio Systems Corporation

We, Radio Systems Corporation, for this Application (IC: 2721A-3001163), hereby acknowledges that this product cannot be distributing, leased, or offered for sale in Canada until it is listed on the Industry Canada Radio Equipment List, the power of sale belong to the Radio Systems Corporation or the company which Radio Systems Corporation authorized.

The Boundary Plus® V5 is compatible with Boundary Plus® and 800 Series Transmitters to contain your pet within areas you choose, or teach your pet to avoid specific areas such as flower beds, gardens, or pools. The transmitter produces a signal that travels along the signal field wire and back to the transmitter to produce an Invisible Boundary.

When your pet approaches the established boundary, the Boundary Plus® V5 generates a tone and correction to remind your pet of the boundary. With training and praise, your pet will quickly learn to avoid the established boundary.
