

Invisible Fence® Brand
Smart™ Doorman™ Owner's Manual

Important Precautions

- Invisible Fence® Brand pet containment systems have contained over three million pets. However, there are some precautions you should take.
- Read and retain manuals
- Adhere to all warnings and cautions contained in any Invisible Fence® Brand manual.

WARNING

- When children are present in the home, it is important to consider the pet door during child proofing activities. The pet door may be misused by a child resulting in the child accessing potential hazards that may be on the other side of the pet door.
- Purchasers/Homeowners with swimming pools should ensure that the pet door is monitored at all times and that the swimming pool has adequate barriers to entry. If a new hazard is created inside or outside of your home, which may be accessed through the pet door, Invisible Fence® Brand recommends that you properly guard access to the hazard or remove the pet door.
- The closing panel or lock, if applicable, is provided for aesthetic and energy efficiency purposes and is not intended as a security device. Invisible Fence® Brand will not be liable for unintended use and the purchaser of this product accepts full responsibility for oversight of the opening it creates.

CAUTION

- This pet door is not a fire door. It is important for the owner and contractor to consider any risks that may be present inside or outside of the pet door, and any risks that may be created by subsequent changes to your property and how they may relate to the existence and use, including misuse of the pet door.

NOTICE

- The user, prior to installation, must become familiar with all building codes that may affect the installation of the pet door and determine, along with a licensed contractor, its suitability in a given installation.
- Keep these instructions with important papers; be sure to transfer these instructions to the new owner of the property.
- Unauthorized changes or modifications may void the user's authority to operate this equipment and void the warranty.

1-Year Limited Warranty - The Invisible Fence® Brand Doorman™ is warranted against manufacture defects for a period of one (1) year from the date of original purchase at retail. Proof of purchase may be required. Does not include gross neglect or abuse. Which includes but is not limited to dog chews, pet scratches, and damage caused by improper use.

Thank you for choosing the Invisible Fence® Brand Doorman™ Electronic Pet Door. You and your pet deserve a companionship that includes memorable moments and a shared understanding together. Our products and training tools promote a lifestyle of protection, teaching, and love—essentials that influence memories for a lifetime. If you have any questions about our products or training your pet, please visit our website at www.invisiblefence.com or contact your local dealer.

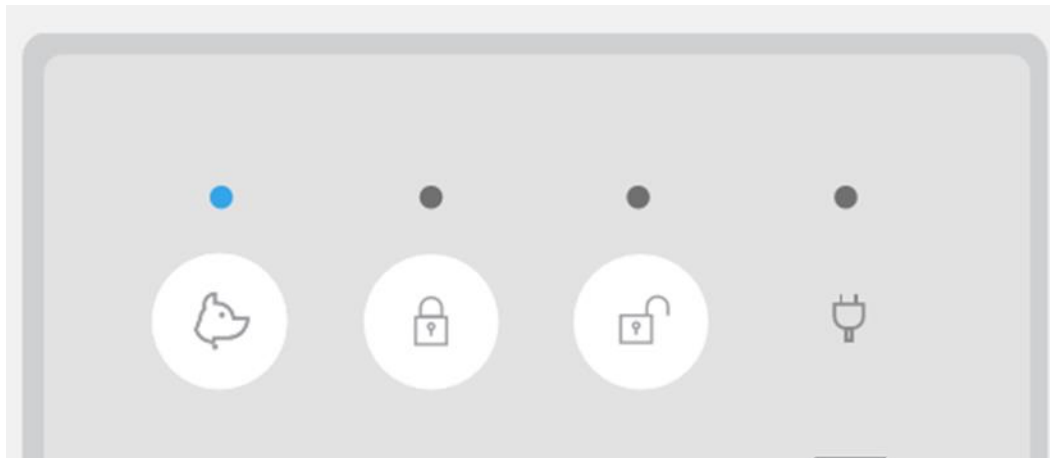

How the Smart™ Doorman™ Pet Door Works

Using radio-frequency technology, the Invisible Fence® Brand Smart™ Doorman™ pet door reads the Computer Collar® SmartLink™ signal and triggers the flap to unlock so the pet(s) can come and go as they please. When the door no longer senses the pets' Computer Collar®; the flap automatically locks back into place.

Controls & Features

Features: The Invisible Fence® Brand Smart™ Doorman™ contains a variety of features and abilities that can be controlled and configured by users

- Switch between Locked, Unlocked and Automatic modes
- View Low Battery Indicator
- Set Signal Activation Range Function
- Change frequencies settings (15k, 20k, 25k)

Controls

- Push Buttons: There are 3 push button switches available for users to control the door mode. The buttons are called Auto/Lock/Unlock
- Modes: Pressing the Lock/Unlock/Auto button will cause the pet door to transition to one of the three available modes:
 - Auto (dog head) When the pet door is placed in Auto mode, it is automatically locked and will only unlock when a programmed Computer Collar comes within proximity of the pet door. The pet door will relock automatically when all programmed collars are out of range for 10 seconds.

- Locked (closed lock) When the pet door is set to Locked mode, the pet door will lock and remain in that mode until the next schedule interval occurs (if Schedule is on) or when the Lock/Unlock/Auto button is pressed. When this mode is selected a programmed Computer Collar has no effect on the pet door.
- Unlocked (open lock) When the pet door is set to Unlocked mode, the pet door will unlock and remain in that mode until a new mode is selected. When this mode is selected a programmed Computer Collar® has no effect on the pet door.
- If the pet door fails to set to the selected mode, there are 3 possible reasons why the pet door may fail to establish the connection
 - High door motor current (motor turning is being hindered in some way)
 - Pet door time out (it took more than 18 seconds to transition to the specified mode)
 - Pet door jams (the door is unable to close, usually caused by an obstruction)

Set-Up

- Place rechargeable battery in large open battery slot on right side of door as you face it. Optional Power adapter (RAC00-13701) can be used in addition to the battery operation.
- Press Lock/Unlock/Auto button for desired mode

Terms of Use and Limitation of Liability

TERMS OF USE

This Product is offered to you conditioned upon your acceptance without modification of the terms, conditions and notices contained herein. Usage of this Product implies acceptance of all such terms, conditions, and notices.

PROPER USE

This Product is designed for use with pets where training is desired. The specific temperament of your pet may not work with this Product. If you are unsure whether this is appropriate for your pet, please consult your veterinarian or certified trainer. Proper use includes reviewing the entire Operating Guide provided with your Product and any specific Caution statements.

NO UNLAWFUL OR PROHIBITED USE

This Product is designed for use with pets only. This pet training device is not intended to harm, injure, or provoke. Using this Product in a way that is not intended could result in violation of Federal, State or local laws.

LIMITATION OF LIABILITY

In no event shall Radio Systems® Corporation be liable for any direct, indirect, punitive, incidental, special or consequential damages, or any damages whatsoever arising out of or connected with the use or misuse of this Product. Buyer assumes all risks and liability from the use of this Product.

MODIFICATION OF TERMS AND CONDITIONS

Radio Systems Corporation® reserves the right to change the terms, conditions and notices under which this Product is offered.

Important Recycling Advice

Please respect the Waste Electrical and Electronic Equipment regulations in your country. This equipment must be recycled. If you no longer require this equipment, do not place it in the normal municipal waste system. Please return it to where it was purchased so it can be placed in our recycling system. If this is not possible, please contact your Invisible Fence® Brand Dealer.

Compliance

US and Canada

Model: RAC00-17202

FCC ID: KE3-3003679

IC: 2721A-3003679

This device complies with Industry Canada rules. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. Cet appareil est conforme à la partie 15 des règles FCC. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Modification or changes to this equipment not expressly approved by Radio Systems® Corporation may void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a specific installation. If interference does occur to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the Computer Collar® unit.
- Connect the equipment to an outlet on a circuit different from that to which the Computer Collar® unit is connect
