

ZACTA TECHNOLOGY CORPORATION

**Date: January 17, 2005**

**Ref: FCC part 15 Class II permissive change for Fujitsu Isotec Limited  
FCC ID: KHZ001M33331A**

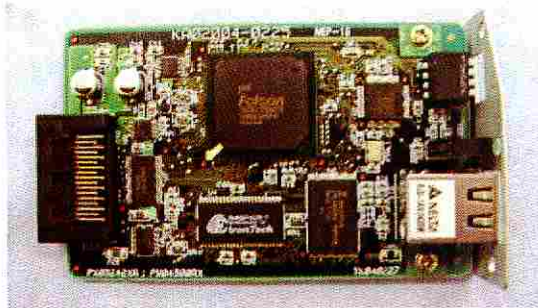

From: Zacta Technology Corporation  
To: Compliance Certification Services

Dear Sir/Madam,

We, *Zacta Technology Corporation*, as EMC testing laboratory and agent, would like to file FCC part 15 Class II permissive change application for *Fujitsu Isotec Limited* FCC ID: KHZ001M33331A. Original grant date of Certification is 02/20/2004.

The changes from original certified device:

**- Addition of optional LAN card**

Due to above change, there are three printing mode for EUT; Parallel I/F, USB I/F and LAN I/F mode. LAN I/F mode only is reported in the test report because it is the worst mode of operation. We confirm that modified EUT still complies with the FCC part 15 class B rules. Enclosed please find attached test report for details. Please note that FCC label and label location are identical to original application.

Best regards,
