To whom it may concern,

We are seeking original certification approval of the DigiTrak® Cable Transmitter (models: ECP and FC) under Part 15.209 of FCC rules. The FCC ID number for this product is KKGA050316. The product is an underground low frequency (12 kHz) magnetic field transmitter powered via a cable attached to a free-standing battery. The transmitter is part of a system that is used for guiding purposes in a horizontal directional drilling operation.

The DigiTrak® ECP and FC transmitters differ only in the color and software changes not effecting compliance. The ECP and FC models are electrically and mechanically identical. The method, equipment, and materials used in the manufacture are also the same.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Bruce E. Kolpack', written in a cursive style.
