March 18, 2009

To whom it may concern,

We are seeking original certification approval of the F2R Handheld Receiver under rule part 90.217. We are using the CalAmp DM-3473 Synthesized UHF transceiver OEM Data module. The FCC ID number for this product is KKGf2R. The product is an above ground locator used for guiding purposes in a horizontal directional drill. It receives a low frequency magnetic signal, measures its signal strength and decodes information which is displayed at the locator and also transmitted via UHF radio to a remote receiver that displays information for the drill operator.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Rudy Zeller', is written over a light blue horizontal line.

Rudy Zeller
