To whom it may concern,

We are seeking original certification approval of the DigiTrak® Mark Series Transmitter (models: DT and DX) under Part 15.209 of FCC rules. The FCC ID number for this product is KKGZ0420. The product is an underground low frequency (33 kHz) magnetic field transmitter and is part of a system that is used for guiding purposes in a horizontal directional drilling operation.

The DigiTrak® DT and DX transmitters differ only in the color and antenna, thus the output power and power consumption (battery life) are also different. The DT and DX models are identical in frequency and modulation as well as the method, equipment, and materials used in the manufacture. The test report DIGC0129 represents both models.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Bruce E. Kolpack', is written above the typed name.
