01/15/10

To whom it may concern,

We are seeking new family certification approval for our 12 kHz short range transmitters (models: FS, ES, LS, and SES) under part 15.209 of FCC rules. The FCC ID for this product is KKGZ0619. Each model is electrically and mechanically identical to each other. The product is an underground low frequency magnetic transmitter and is part of a system that is used for guiding purposes in a horizontal directional drill.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Rudy Zeller', is written over a light blue horizontal line.

Rudy Zeller
