RE: Savi Technology

FCC ID: KL7-600SP-V2

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Photographs may not be held confidential based only upon on the basis of trade secrets. Please remove this justification form the letter of confidentiality or provide a better justification. As an alternative, you may use a black marker to "black out" the top of any readable components and provide new internal photographs. Please provide comments with respect to this issue.
- 2) Please supply a clearer exhibit for the label.
- 3) The product documentation (users manual) refers to 2 different model signposts, each with different antennas (internal vs. external). Please confirm that this application is only for the model with external antenna.
- 4) Please correct the test summary on page 4 of 13 (for radiated interference field strength) to match the test data obtained.
- 5) All testing was performed with the antenna positioned in the horizontal axis only. Please comment on if the unit is ever expected to be installed in the vertical axis.
- 6) Please explain derivation of the limit and/or frequencies used for Run #2, Page 6 of 10.

Timothy R. Johnson
Examining Engineer
