RE: Savi Technology

FCC ID: KL7-612T-V2 - Class 2 Permissive Change

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please provide a 731 form for this application.
- 2) Please provide a detailed explanation how the device has changed from the approved model. Please be sure to address any schematic changes, PCB depopulation, layout changes, component changes, enclosure changes, etc.
- 3) Several sections on pages 4, 5, & 12 of 14 of the test report states both 15.231 (a)/(b) & (e). These sections should refer to section (e) only.
- 4) The results given on page 4 of 6 do not match the data in the test report.
- 5) The schematics are contained within the test report provided, but the previous submittal listed the schematics as confidential. Please let us know if the schematics should be removed before the test report is uploaded since the test report may not be held as confidential.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
