Inquiry:

We are reviewing a tag that operates under both 15.231 and 15.240. Are the requirements of 15.240(a),(e), and (f) required to be provided with the tag if this information is already provided with the reader that is certified under 15.240. Note that the tags are more transparent to the user.

Response:

You describe an industrial tag reader that is a composite device operating under 15.231, and 15.240. The provisions of Section 15.240 only apply to the tag reader, not to the tags themselves.
