Dear Sir or Madam,

**Re: Type Approval of McMurdo-ICS NAV5plus NAVTEX Receiver**

The NAV5plus is an enhancement of the existing NAV5 design, previously type approved by the Federal Communications Commission (FCC) for Alden Electronics (ICS Electronics, US Importer/Distributor), FCC Identifier: J37NAV5-9347 dated 2<sup>nd</sup> April 1996 and apart from the following improvements, the fundamental design of the equipment has not been changed: -

1. A second receiver has been added, as standard, to receive transmissions on 490 kHz.
2. The circuitry has been updated to comply with the latest EMC regulations.
3. A Serial output has been added, which outputs data in a proprietary format.
4. The external appearance has been changed to include McMurdo branding.

The NAV5plus fully meets the requirements of ITU Recommendation 540-2 and also meets the requirements of Resolution MSC.148 (77) (adopted on 3 June 2003), as statements below, listing confirmation or otherwise against performance standards listed in the Annex: -
