

To whom it may concern

4th October 2004

Dear Sir/Madam,

Re: Reference FCC Correspondence Number: 27725.

It is confirmed the following: -

- 1) The McMurdo Ltd., FCC approval application (EA443964) is for a new product approval e.g. NAV5plus. However, as the NAV5plus is an upgrade of the NAV5 (McMurdo letter dated 2nd June 2004 with initial application refers) and as the NAV5plus contains a lot of the present NAV5 equipment, it was decided that some NAV5 documentation should also support the application, although the NAV5plus and the NAV5 are 2 different branded products with separate EC MED type approval certification. Also as the NAV5 was manufactured by ICS Electronics Ltd, who have since merged with McMurdo Ltd, a copy of the official merger letter was included as additional supporting information.
- 2) The application requests confidentiality on some documents at additional costs, as selected and shown on the OET Exhibits Summary List against the relevant documents indicated. Those relevant documents are listed as they contain proprietary design information not to be passed to a third party.
- 3) It is confirmed in addition to 2) above, that the following documents listed under the Operational Description can be omitted from the confidentiality list and moved and placed under the Test Report Exhibit Section:
Receiver PCB
Main PCB Test
Acceptance Test
Receiver Performance

Should you require any additional information, please don't hesitate to contact the undersigned.

Yours faithfully

Derek Carr
