Operation of the device

The “RC Webasto” product is an automotive remote controlled device.

With the “RC Webasto” you can activate the functions of a “WEBASTO HEATER”.

The central unit, with power supply of 12Vdc, is mounted inside the vehicle and connected according to the electrical drawing.

The device has 2 timing output; “HEATER” and “SUMMER” (max preselection time = 60 minutes) to drive the heater functions.

These output can be activated pressing the “P1” or “P2” button of the remote control.

When one output is activate, the second output can't be switched ON.

At the same time, during the switch ON of the “P1” or “P2” output, the parking light output and the LED output are activate.

The switch OFF of the 2 output can be obtained in the following ways:

- 1) Automatically after 60 minutes from the switch ON
- 2) Pushing the “P3” button of the remote control
- 3) At the power ON of the ignition key (+15 ON)

When the ignition key is switched ON, no output of the “RC Webasto” is activated.
