RE: Fix Internal Pictures submitted on May 6th, 2016 & then on June 30th, 2016
FCC ID: KNYPMT0101AA (Previous FCC ID)
FCC ID: KNYPMT0101AB (New FCC ID)

To Whom It May Concern:

I, hereby, declare that the pictures submitted on May 6th, 2016 under FCC ID: KNYPMT0101AA and then submitted on June 30th, 2016 under New FCC ID: KNYPMT0101AB for the same product belong to the older version of the board EPC0091XB and not to the currently shipping version EPC0091XC.

The unit with Serial number 402-6695017 tested at Intertek and then at Compliance Testing Lab was the most current version EPC0091XC (both layout and bill of materials). The older internal pictures of EPC0091XB were mistakenly submitted to the labs and then FCC at that time.

We would like to resolve this issue and **replace older version internal pictures with current version.**

Please contact me if there is any information you may need.

Sincerely,

A handwritten signature in black ink that reads "Riaz Momand".
