Re: Certification for Lear Transmitter  
Model(s): UHR  
FCC ID: KOBGTE05A

REQUEST FOR CONFIDENTIALITY

Pursuant to 47 CRF 0.459, Lear requests that a part of the subject application be held confidential. This comprises Exhibits

- (4) Block Diagram
- (5) Schematics
- (10) Parts List and Placement
- (11) Description of Operation

Lear has spent substantial effort in developing this product and it is one of the first of its kind in industry. Having the subject information easily available to "competition" would negate the advantage they have achieved by developing this product. Not protecting the details of the design will result in financial hardship.

If there are any questions regarding this request, please contact me at the above address or call 734-483-4211, fax 734-647-2106 or e-mail [liepa@umich.edu](mailto:liepa@umich.edu).

Sincerely,

A handwritten signature in black ink that reads "Valdis V. Liepa".

Model(s): UHR  
FCC ID: KOBGTE05A

REQUEST FOR SHORT-TERM CONFIDENTIALITY

Pursuant to 47 CFR 0.457 and 0.459, Lear requests that a part of the subject application be temporarily withheld from public disclosure for an initial period of 45 days. This comprises Exhibit(s)

- (3) External Photos
- (7) Test Setup Photos
- (8) User's Manual
- (9) Internal Photos

The device in question will not be available to the consumer until the 2007/2008 automotive model year. Thus, Lear requests that the above exhibits not be made public at this time. Lear will continue to request the short-term confidentiality every 45 day period, up to 180 days from the date of grant, as necessary prior to release of the device.

If there are any questions regarding this request, please contact me at the above address or call 734-483-4211, fax 734-647-2106 or e-mail [liepa@umich.edu](mailto:liepa@umich.edu).

Sincerely,

A handwritten signature in cursive script that reads "Valdis V. Liepa".

STATEMENT OF MODIFICATIONS

There were no modifications made to the DUT by this test laboratory. However, during product development this laboratory was used by the applicant to determine correct output power levels for the device over all operating frequencies. (Also see Section 3.1 of the attached Test Report).

A handwritten signature in black ink that reads 'Valdis V. Liepa'.
