Re: Certification for Lear Receiver  
FCC ID: KOBJLR09A  
IC: 3521A-JLR09A

REQUEST FOR CONFIDENTIALITY

Pursuant to FCC 47 CRF 0.457(d) and 0.459 and IC RSP-100, Section 10, Lear requests that a part of the subject application be held confidential. Lear has spent substantial effort in developing this product and it is one of the first of its kind in industry. Having the subject information easily available to "competition" would negate the advantage they have achieved by developing this product. Not protecting the details of the design will result in financial hardship.

1. Block Diagram includes internal oscillator frequency information that the manufacturer considers to be proprietary.

2. DUT is FULLY potted using a non-removable epoxy based material. Removal of potting material causes irreparable damage to internal circuitry. Photograph exhibits outline the half-clam-shell device before and after potting.

**Permanent Confidentiality:** Lear requests the exhibits listed above as permanently confidential be permanently withheld from public review.

**Short-Term Confidentiality (FCC Only):** Lear requests the exhibits selected above as short term confidential be withheld from public view for a period of 45 days from the date of the Grant of Equipment Authorization and prior to marketing.

If there are any questions regarding this request, please contact me at the above address or call 734-483-4211, fax 734-647-2106 or e-mail [liepa@umich.edu](mailto:liepa@umich.edu).
