Subject: Cover letter describing Model LT1110-10 family of transceivers

FCC ID: KQL-111010

IC: 2268C-111010

Aerocomm's LT1110-10 family of 902-928Mhz Frequency Hopping transceivers is made up of 4 different part numbers. The hardware platform for the LT1110-10 family has the option for either an integrated chip antenna or a U.FL rf connector. The section of board that contains the chip antenna is physically removed when it is not populated.

<u>Model #</u>	<u>Description</u>
-----------------------	---------------------------

PRM210	Surface Mount with U.FL rf connector
PRM211	Surface Mount with integrated chip antenna
PRM220	Pluggable with U.FL rf connector
PRM221	Pluggable with integrated chip antenna

The family will be referred to as LT1110-10 in all FCC and IC documentation!
