December 6, 2007

PHOENIX TEST-LAB GmbH
Koenigswinkel 10
D-32825 Blomberg
Germany

In reference to FCC ID: KQL-ZB2430D

**Justification for Part 15 Unlicensed Modular Transmitter Approval
according to DA 00-1407**

1. Own RF shielding
Complied, see EUT internal photographs
2. Buffered modulation inputs
Complied, see schematic diagrams
3. Own power supply regulation
Complied, voltage going to the VCO and PLL is regulated to ensure clean and stable operation
4. Antenna requirements
Complied, either RF module is equipped with internal surface mounted antenna or alternatively UFL connector
5. Test in stand-alone configuration
Complied, see test report for details
6. Own FCC ID
Complied, the exterior label will be **"Contains FCC ID KQL-ZB2430D"**
7. The Modular Transmitter must comply with any specific rule and the manufacturer must provide adequate instructions. The EUT is compliant with all applicable FCC rules. Detail instructions are given in the user guide.
8. RF Exposure requirements
The max output power of the device (conducted -0.22 dBm / Ant Gain 5 dBi) is far below the limits as defined in the TCB exclusion list and therefore approved for portable and mobile classified end configurations.
